STREET

The street is where things happen, where life comes alive. The Harley-Davidson Street™ 750 and 500 motorcycles take you there, with liquid-cooled Harley-Davidson muscle; lean, agile handling, and a healthy dose of Dark Custom™ attitude.

STREET

500

XG500 | PRODUCTION COLOR: VIVID BLACK

Turn day into night on this Vivid Black Harley-Davidson Street™ 500 model. The black Daymaker™ LED headlamp lights the way and the cut-back Typhoon wheels with polished brake rotors keep things rolling. The Café solo seat keeps it simple, and the blacked-out Dark Custom™ trim, machined Edge Cut controls, and Buckshot exhaust shields continue the sinister look.

SEE WHAT'S ON THIS BIKE AT [H-D.COM/GALLERY](https://www.harley-davidson.com/gallery)

STREET

750

X6750 | PRODUCTION COLOR: MYSTERIOUS RED SUNGLO

The perfect play of black against red, this Harley-Davidson Street™ 750 model strikes a muscular pose. The black and aluminum Burst and Edge Cut accessories complement the bike's factory-accented cylinder fins, and the black detachable passenger backrest and luggage rack add practical support without overshadowing the Dark Custom™ attitude.

STREET 750 TRANSFORMATION

This Harley-Davidson Street™ 750 model starts out as the perfect combination of agile, liquid-cooled efficiency and flat-out urban fun – all with classic Dark Custom™ attitude.

STREET SMARTS

From there, it doesn't take much to turn the Harley-Davidson Street™ motorcycle into a one-of-a-kind custom masterpiece. This bike's classic Red & White Two-Tone custom paint, Edge Cut grips, Burst Collection foot controls and other bright accents add a traditional “Harley” touch to this Street 750

model's basic black approach. The Dark Custom™ medallions and the Screamin' Eagle® Edge Cut muffler end cap complement the 750's machined aluminum wheel and cylinder highlights, while the removable passenger backrest and luggage rack offer practical comfort and support for two.

FIT

One size can fit all. The nimble Harley-Davidson Street™ motorcycle is designed to accommodate a wide range of body types. Equipped with a Tallboy® seat or Reduced Reach seat or bar, the bike can be tailored to accommodate almost any rider.

FUNCTION

Comfort, convenience and conspicuousness: The basics of everyday riding. Adding a passenger backrest, luggage rack and soft luggage lets you pack for your commute or for a weekend away from the office. And the Daymaker™ LED headlamp makes sure others notice you.

CARE AND MAINTENANCE

While it's tempting to use standard “auto parts store” cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

MAGNETIC TANK BAG & REDUCED REACH BAR

CHROME TYPHOON WHEELS & AXLE COVERS

STYLE

The Harley-Davidson Street™ motorcycle is the perfect blank canvas. Its Dark Custom™ roots let you establish the bike's personality from day one. Make a sinister statement in black, or dress it up in chrome. Determine a path that's right for you, and layer on the details that express your soul.

PERFORMANCE

The 750cc H-D® Revolution X™ liquid-cooled V-Twin engine delivers authentic Harley-Davidson® sounds every time you twist the throttle. And you can add a little extra punch with system-matched Screamin' Eagle® performance parts.

CRAFTSMANSHIP

We design and build the bikes, so we don't need to “reverse-engineer” parts to try and make them fit. Everything we make is rigorously tested to ensure it meets our high standards, and the finishes of our accessories match the bike's surfaces for a consistent appearance.

Windshields & Handlebars

A. QUICK-RELEASE SUPER SPORT WINDSHIELD

Reduces the pounding of wind and shower of bugs but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride, the sleek profile of the Super Sport Windshield hugs the front headlamp for a sporty look. The windshield mounts to the fork tubes with elegant die-cast lever locking clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience and a clean, custom look. No tools are required and the kit includes everything needed to install the windshield.

Headlamps feature horizontal "D-shaped" lenses that focus light into a pool in front of the motorcycle and separate high beam and low beam projector lenses that provide a focused beam of light ahead. Lamps are available in your choice of brilliant chrome or gloss black background to match your styling direction. The solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assembly mounts into existing light housings. Installation is quick and easy and the plug-in lamps connect to the factory headlamp wiring. The LED lamps are DOT and ECE approved.

D. CAFÉ SOLO SEAT

D. CAFÉ SOLO SEAT

There's something about the placement of the rider that makes the Café Solo Seat special. The one-up design and the high back pad hold the rider in place and provide a direct connection to the bike. You sit "in" the bike and your hands and feet reach naturally to the controls. The low-slung pad, narrow nose and the tapered tail enhance the bike's sporting profile and pays homage to the heritage of the iconic Café Racer style.

E. REDUCED REACH® SEAT

Designed specifically for riders requiring a close to the bar riding position, this Reduced Reach® Seat is shaped to place the rider in a comfortable and confident relationship to the hand and foot controls. The seat moves the rider approximately 1.5" lower and 1.25" forward and the 1.25" slimmer front profile brings the legs closer together for an easier reach to the ground at a stop. The Reduced Reach Seat features a stepped profile that keeps the rider from sliding back during acceleration.

52000123 **\$201.95**
Fits '15-later XG models. Seat width 10.25"; passenger pillion width 6.75".

F. TALLBOY® SEAT

The correct riding position can help a tall rider sit comfortably on the bike, and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider 1.25" up and 2.5" back from the stock seating position, a Tallboy Seat can eliminate the "knees-high" riding position and effectively places the body for a natural arm and leg reach to the controls.

V-ROD®

Few motorcycles have broken deeper ground than the Harley-Davidson® V-Rod® motorcycles, unleashed to the riding public in 2002. With drag-bike styling and street-smart, liquid-cooled performance, they blazed a trail for a whole new breed of rider.

VRSC™

V-ROD MUSCLE®

VRSCF | PRODUCTION COLOR: MYSTERIOUS RED SUNGLO WITH FLAMES

This sleek and sexy V-Rod Muscle® motorcycle combines drag strip styling with a hot-rod mentality. Flamed Mysterious Red Sunglo paint, Black Ice wheels and rich red brake calipers add a noticeable high-performance touch, while the passenger backrest and luggage rack keep things practical.

VRSC™

NIGHT ROD® SPECIAL

VRSCDX | PRODUCTION COLOR: DEEP JADE PEARL

Liquid-cooled Revolution® engine performance and attitude are within easy reach on this Night Rod® Special motorcycle with 5-Spoke Black Ice wheels and factory Deep Jade Pearl paint. The Reduced Reach seat brings the rider closer to the blacked-out handlebar and controls, freeing up extra room for your favorite passenger – or someone you just met.

SEE WHAT'S ON THIS BIKE AT [H-D.COM/GALLERY](https://www.harley-davidson.com/gallery)

V-ROD MUSCLE® TRANSFORMATION

With loads of horsepower, 86 foot pounds of torque, and a blend of drag strip and boulevard style, this race-bred powerhouse is revved-up and ready to jump off the starting line.

POWER PLAYER

See those bright red dual front brake calipers? That tells you this baby is born to run. Other clues? The monstrous 240mm rear tire wrapped around liquid-smooth Black Ice 5-spoke wheels, mirror polished brake rotors, and the black hot-rod flames covering the Mysterious Red Sunglo paint set.

Chrome engine covers, hand grips, hand controls, and foot controls catch just the right amount of light, and we've added a backrest pad and matching luggage rack—just to make sure you and your passenger enjoy all that style, power, and performance.

FIT

Dressed in tactified rubber, Get-A-Grip™ hand grips provide a positive connection to the bike in wet or dry weather. If the stretch to those grips is a little too far, the V-Rod Muscle® motorcycle can be outfitted with a Reduced Reach handlebar to keep you firmly in control.

FUNCTION

Comfort and convenience are the basics of everyday riding. Add a passenger backrest, luggage rack and set of soft luggage for your run to the office, or add an H-D® Detachables™ windshield, switch off your cell phone, and you are ready to leave the city streets behind.

STYLE

Brawn is back. Five knife-edge spokes on the wheels define the distinctive hot-rod style, and their Black Ice finish is the perfect yin and yang to the satin aluminum finish on the engine cases, exhaust, and swingarm. Finish with a few touches of red for a little added heat.

PERFORMANCE

Out of the box, the Revolution® engine packs a punch and delivers a distinctive Harley-Davidson® sound at the twist the throttle. To let it breathe a little deeper, add a Screamin' Eagle® High-Flo air cleaner under the flamed airbox.

CARE AND MAINTENANCE

While it's tempting to use standard "auto parts store" cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

CRAFTSMANSHIP

We design and build the bikes, so we don't need to "reverse-engineer" parts to try and make them fit. Everything we make is rigorously tested to ensure it meets our high standards, and the finishes of our accessories match the bike's surfaces for a consistent appearance.

Wheels & Brake Rotors

A. V-ROD® 5-SPOKE WHEEL – BLACK ICE

Brawn is back. Five big and beefy spokes define the distinctive hot rod styling and the knife-edge shape provides an angular spin on the traditional custom wheel look. Treated to the exclusive Black Ice finish, these mirror-smooth wheels add an incredible depth and shimmer that is impossible to reach with an ordinary “black chrome” finish. Pick your styling direction; the rich black finish blends easily into a blacked-out bike, but the wet-look shimmer holds its own in the company of chrome as well. All Genuine Motor Accessory wheels have been certified by Harley-Davidson to perform to our tough vehicle standards for fit, quality and durability. Wheels require separate purchase of model-specific Wheel Installation Kit, Sprocket hardware and Brake Rotor-specific hardware. See I-sheet for details.

SEVENTY-TWO®

XL1200V | PRODUCTION COLOR: BLACK QUARTZ

A few key mods are all it takes to turn this Seventy-Two® model into a long, low hot rod. The rolled-down Drag Bar puts riders in a café racer position. The distressed leather and brass rigid-mount Bobber Solo Saddle takes “minimal” to a new level, and the narrow whitewall tires and retro Smooth Air Cleaner Cover add a nostalgic touch.

SPORTSTER®

FORTY-EIGHT®

XL1200X | PRODUCTION COLOR: HARD CANDY BIG RED FLAKE

The first thing you notice on this Forty-Eight® model is the eye-popping Hard Candy Big Red Flake paint on the classic "peanut" gas tank. But don't miss the edgy Chizeled bars*, Burst Collection foot controls, and the white piping on the Black Diamond Solo Spring Saddle that add a bit of flair and anchor the bike in old-school cool.

SEVENTY-TWO® TRANSFORMATION

With an authentic '70s chopper attitude, Hard Candy Custom™ paint, and loads of chrome, the Seventy-Two® model rolls off the factory floor as a low-rider-inspired radical custom.

CUSTOM CLASSIC

We've taken this custom Seventy-Two® motorcycle even deeper into a classic era with a number of well-chosen enhancements. Taking their cues from the stock whitewall tires, nostalgic white hand grips and the White Diamond Solo Saddle set a decidedly retro tone. The black piping

gives this classic seat a striking look, while its external springs soften the ride. The chrome Chizeled handlebar*, low-set Tribal mirrors and the chrome swingarm complete the profile, while the Screamin' Eagle® Street Cannon slip-on mufflers boost performance to thoroughly modern levels.

*Handlebar height is regulated in many areas. Check local laws before installing.

Parts list available at h-d.com/gallery

FIT

The Chizeled handlebar* provide an upright “fists in the wind” riding posture with a ‘70s lane-splitting narrow profile. For a clean, custom look, the “Z” bar features cast mitered corners for easy internal wiring.

FUNCTION

Cool can be practical. Equipped for a run to the to the pool hall or for a night on the town, this narrow and nimble ride is perfect for squeezing through traffic. Add a swingarm bag, and you can stash your stuff in style.

STYLE

With its smooth metal seat pan and simple frame cover, the Solo Spring Saddle delivers a clean, finished old-school look—without any frame cutting or modifications. So you can always install a traditional two-up seat when you want to take someone along for the ride.

PERFORMANCE

The Screamin' Eagle® Street Cannon slip-on mufflers provide free flow of exhaust gases with just the right amount of back pressure for a smooth-running ride, an exhaust note with extra deep bass, and performance you can feel.

CARE AND MAINTENANCE

While it's tempting to use standard “auto parts store” cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

CRAFTSMANSHIP

We design and build the bikes, so we don't need to “reverse-engineer” parts to try and make them fit. Everything we make is rigorously tested to ensure it meets our high standards, and the finishes of our accessories match the bike's surfaces for a consistent appearance.

A. H-D® DETACHABLE COMPACT WINDSHIELD FOR MODELS WITH AUXILIARY LIGHTING

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. B. VENTILATOR QUICK-RELEASE COMPACT WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

PAMPER YOUR BEHIND

Experience ultimate comfort. Road Zeppelin® seats and seat pads are equipped with a unique air bladder system that distributes rider weight across the entire seating surface. By reducing pressure points and providing shock absorption, this pad allows you to ride your cool low-profile seat for hundreds of miles. The mesh cover lets air circulate beneath the rider's body, reducing the temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

SPORTSTER® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander®, Brawler® and Sidekick® seats bring you lower to the ground than most other seats.

REDUCED REACH® SEATS

Get even closer. This Solo Seat is shaped to move the rider 3.0" forward and 1.0" lower for a confident reach to the hand and foot controls. The narrow nose brings the legs 1.0" closer together for a comfortable reach to the ground and the scooped bucket-shape and back support keeps the rider from sliding backward during acceleration.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

CUSTOM SEAT PROGRAM

A personalized seat is the perfect thread to tie your bike's attitude together. Select the stitching pattern, leather inlay and thread color that best support your custom movement and you'll have your personalized seat in just three weeks. Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a H-D® Detachables™ Sideplate Kit and appropriate Docking Hardware to make adding or removing a detachable accessory a simple “slide and click” proposition.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

SUSPENSION

While most current Sportster® models are already equipped with low-profile suspension, Harley® offers optional two-up shocks that maintain the low ride height and add additional carrying capacity. Or, if you are willing to exchange the low-profile “slammed” look for improved ride comfort, Comfort Flex standard-length shocks deliver an improved ride through a longer stroke.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort.

SEATS

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you – and your passenger.

FOOT CONTROLS

Where your feet contact the controls can often determine how many miles you can put on in a day. Mid-controls position your feet below the knee for a sporting riding posture, while forward controls stretch your legs for a relaxed, laid-back posture.

B. REDUCED REACH FORWARD CONTROL CONVERSION KIT*

Love the look and riding position you get with forward controls but not comfortable with the long stretch forward? This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by 2.0" and positions the controls closer to the rider for added comfort and confidence. This kit provides additional leg clearance around the chassis and air cleaner by moving the footpegs outward 1.5" (left) and 0.5" (right). The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. This easy-to-install Conversion Kit includes heavy-duty steel mounts and shortened brake rod and reuses Original Equipment control supports and brake and shift levers or can be personalized with your choice of custom lever styles.

Feel a little cramped when your feet are placed on the standard-location mid-controls? This kit repositions the controls 3.0" forward of the stock location, eliminating the "knees-high" riding attitude while maintaining a sporty upright riding posture. The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes control mounts, brake and shift levers, brake rod, mini-footboards with wear pegs and all hardware necessary to convert your mid- or forward-control equipped Sportster® model.

Fits '14-later XL models.

SWITCHBACK™

FLD | PRODUCTION COLOR: VIVID BLACK

Presenting a true touring powerhouse. Outfitted with a narrow beach bar, Rallyrunner® seat and passenger backrest, this machine is ready to rack up the miles. And while all that chrome brightens up the day, you're ready to fight back the night with Daymaker™ Reflector LED headlamps, auxiliary lamps, and fog lamps to light the way.

LOW RIDER® TRANSFORMATION

The latest in a long line of customs, the Low Rider® model honors its legendary heritage with black-highlighted accents, a '70s inspired seat, and unmistakable sculpted 2-into-1 exhaust.

HIGH STYLE

Of course, true lovers of the Low Rider® model legend will still want to make it something to call their own. It starts with a dark and seductive Black Magic paint that plays off the abundant chrome highlights—from the short sissy bar to the Teardrop floating brake rotors—for a shine that just

can't be missed. The Daymaker™ LED headlamp and LED turn signals and tail lamp make sure you draw needed attention at night, and the lightly smoked Quick Release Compact Windshield will cut through the breeze, but comes off in seconds when you'd rather feel the wind in your face.

FIT

Parts list available at [h-d.com/gallery](https://www.harley-davidson.com/gallery)

Featuring a unique handlebar riser that provides 2.4" of adjustment and an innovative seat design that allows 1.5" of fore-aft movement, the Low Rider® model will fit almost any rider. Sit down, grab ahold, and take off.

FUNCTION

So what if Sturgis is 1,200 miles away. With a detachable windshield, a backrest, and some soft touring luggage on the passenger pillion, this Low Rider® model is ready to comfortably chew up the miles. And when you get there, strip off the gear and hit the town.

CARE AND MAINTENANCE

While it's tempting to use standard "auto parts store" cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

DAYMAKER™ LED HEADLAMP

SCREAMIN' EAGLE® VENTILATOR AIR CLEANER

STYLE

Dipped in chrome, this fully loaded Low Rider® model grabs your attention and doesn't let go. From the chrome hand controls and engine trim to the chrome swingarm and layback license plate, this bike is the definition of the long and lean look.

PERFORMANCE

The low profile Screamin' Eagle® Ventilator exposed element air cleaner provides increased airflow to boost the power, and the 2-into-1 Screamin' Eagle® Nightstick muffler provides the deep-throated rumble we are famous for.

CRAFTSMANSHIP

We design and build the bikes, so we don't need to "reverse-engineer" parts to try and make them fit. Everything we make is rigorously tested to ensure it meets our high standards, and the finishes of our accessories match the bike's surfaces for a consistent appearance.

C. VENTILATOR QUICK-RELEASE COMPACT WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you – and your passenger.

PAMPER YOUR BEHIND

Experience ultimate comfort. Road Zeppelin® seats and seat pads are equipped with a unique air bladder system that distributed rider weight across the entire seating surface. By reducing pressure points and providing shock absorption, this pad allows you to ride your cool low-profile seat for hundreds of miles. The mesh cover lets air circulate beneath the rider's body, reducing the temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

Note: Some Harley-Davidson seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a H-D® Detachables™ sideplate kit and appropriate Docking Hardware to make adding or removing a detachable accessory a simple “slide and click” proposition.

H-D® Rigid Sideplates

Add practical comfort and support for your passenger. Rigid Sideplates supports are the anchor for sissy bar uprights, backrest pads and luggage racks, and hug the rear fender strut for a clean, streamlined look. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

SUSPENSION

While most current Dyna® models are already equipped with low-profile suspension, Harley offers model-specific suspension options to improve your ride comfort.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort.

SEATS

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you – and your passenger.

FOOT CONTROLS

Where your feet contact the controls can often determine how many miles you can put on in a day. Mid-controls position your feet below the knee for a sporting riding posture, while forward controls stretch your legs for a relaxed, laid-back posture. For more details, visit h-d.com/fitshop.

This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by over 1.0", positioning the controls closer to the rider for added comfort and confidence. The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. Foot Controls

A. FURTHER FORWARD MID-CONTROL KIT

Feel a little cramped when your feet are placed on the standard-location mid-controls? This kit repositions the controls 2.0" forward of the stock location, eliminating the "knees-high" riding attitude while maintaining a sporty upright riding posture. The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes chrome left and right footrest brackets, highly polished brake lever and chrome shift lever. Use stock footpegs, brake and shift linkages or, choose from other Dyna® collection offerings to complete your look.

50500386 **\$319.95**
Fits '06-later Dyna models with mid-controls. Original Equipment on '14-later FXDL models.

B. RIDER FOOTBOARD KIT

Convert your Dyna model to touring-oriented footboard-based controls. Ideal for riders with an inseam too long for mid-controls or for riders who prefer the extra foot room on long rides, this complete kit moves the foot brake and shift lever forward from the standard position. The installation places the rider into a comfortable upright posture with a flat foot and bent knee profile. This position provides additional support by allowing the legs to take some of the rider's weight, while providing the freedom to reposition the feet during the ride. The kit includes left and right footboards with inserts, footboard supports, brake lever, brake and shift linkage, brake pedal pad and all required hardware. Installation reuses Original Equipment shift lever. Customize the look by adding your choice of accessory traditional D-shaped rider footboard inserts and large brake pedal pads.

Fits '06-later FXD, FXDB, FXDC and '06-'13 FXDL models. Also fits '06-'08 FXDWG models. Stock on '12-later FLD models. Not for use with frame-mounted highway pegs.

FLSTFB | COLORSHOP CUSTOM PAINT: LIMITED-MIDNITE BLAZE

Take a close look at the striking Midnite Blaze limited custom paint set. See the copper tone sparkling underneath the black? Look again, when the sun hits it, you'll get a glimpse. FAT BOY® LO TRANSFORMATION

The Fat Boy® model is a true landmark in custom styling. Combining hardtail lines with solid wheels and beefy tires presents a profile that is the ideal canvas for creating your work of art.

EYE OPENER

They say that dark is just the absence of light, but this blacked-out beauty radiates a glow all its own. The Charcoal Pearl paint serves as the perfect backdrop, and the black fork sliders and Screamin' Eagle® slip-on mufflers focus your attention on the heart of the bike: the satin-finished

Twin Cam engine. The fat drag handlebar, hand controls, foot controls and the Solo Spring Saddle continue the blacked-out theme, while the machined aluminum accents of the Burst Collection grips, air cleaner and axle covers provide just the right amount of pop.

Parts list available at h-d.com/gallery

FIT

The combination of drag-style handlebars, Solo Spring Saddle and floorboards place the rider in an aggressive riding posture-perfect for attacking urban riding conditions. And the Profile® Low front suspension helps you plant your feet at the next light.

FUNCTION

Want to ride cross-country? Your trip is less than an hour away. Simply remove the spring seat hardware, reinstall the Original Equipment seat, pop on an H-D® Detachables™ windshield and backrest, and hit the road.

STYLE

Black is the new chrome. With a mix of gloss black, flat black and satin silver, the almost total absence of brightwork on this Fat Boy® model makes a statement all its own. The look is all business, and just a little bad-ass.

PERFORMANCE

Tough look, nice sound. The free-breathing Screamin' Eagle® Burst air cleaner and Street Performance mufflers move a lot of air, and work together to deliver improved low end grunt and passing power you can feel.

CARE AND MAINTENANCE

While it's tempting to use standard "auto parts store" cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

We design and build the bikes, so we don't need to "reverse-engineer" parts to try and make them fit. Everything we make is rigorously tested to ensure it meets our high standards, and the finishes of our accessories match the bike's surfaces for a consistent appearance.

Windshields

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your siteline so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

B. VENTILATOR H-D® DETACHABLES™ WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

PAMPER YOUR BEHIND

Experience ultimate comfort. Road Zeppelin® seat and seat pads are equipped with a unique air bladder system that distributed rider weight across the entire seating surface. By reducing pressure points and providing shock absorption, this pad allows you to ride your cool low profile seat for hundreds of miles. The mesh cover lets air to circulate beneath the rider's body, reducing the temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

TOURING SEATS

Designed for comfort, Sundowner™, Signature Series® and other touring seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

CUSTOM SEATING PROGRAM

A personalized seat is the perfect thread to tie your bike's attitude together. Select the stitching pattern, leather inlay and thread color that best support your custom movement and you'll have your personalized seat in just three weeks. Seating – Solo

A. BOBBER SOLO SADDLE

How low can you go? This minimalist solo seat takes the stripped-down garage-built look about as far as you can go. The thick distressed black leather cover is bonded directly to the formed metal seat pan and minimizes the foam filler and the extra height it brings. Easy to install, the bolt-on seat and model-specific Installation Kit includes everything you need to get the bobber look. No cutting, welding or fabrication is necessary.

NEVER IN A TIGHT SPOT

On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should feel like an extension of yourself. So, once you've picked the bike, it's time to choose the options that best equips your ride to your personal dimensions.

SUSPENSION

While many current Softail® models are already equipped with low-profile suspension, Harley offers optional front and rear lowering kits to tailor your bike to your size. Or, if you are willing to exchange the low-profile "slammed" look for improved ride comfort, Comfort Flex standard-length shocks deliver a superior ride through a longer stroke.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort.

SEATS

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you – and your passenger.

FOOT CONTROLS

Where your feet contact the controls can often determine how many miles you can put on in a day. Footboards position your feet below the knee for an upright riding posture, while forward controls stretch your legs for a relaxed, laid-back posture.

FIT

Throw your fists to the wind with the Mini-Ape Handlebar®. Shaped to rest your hands just above the top of the classic batwing fairing, these bars feature a tall stance and minimal amount of pull back that help to achieve a cool yet comfortable riding profile.

FUNCTION

From a solo ride to work to a two-up ride across the country, the Street Glide® model can be anything you want it to be. With the turn of a thumbscrew, you change the seat—from the twist of the H-D® Detachables™ cam lock, you can install a backrest or Tour-Pak® luggage.

STYLE

Chrome is king. The wide-open Aggressor wheels and rotors add lightness to this Street Glide® model's profile, and focus your eye on the brilliant finish on the Twin Cam engine and Slipstream hand and foot controls.

PERFORMANCE

The Screamin' Eagle® Ventilator Elite air cleaner and Nightstick 2-into-2 mufflers work together to pass a large volume of air through the 103HO Twin Cam engine—delivering maximum performance and an aggressive exhaust note.

CARE AND MAINTENANCE

While it's tempting to use standard “auto parts store” cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

Windshields – Road King®

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your site line so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

57400176 **\$429.95**
Fits '94-later Road King® models (except FLHRS). Does not fit with Mini Tach or Boom!™ Audio Cruiser Speakers Stock on '13-'14 FLHRS. Windshield dimensions: Overall height – 22.4" height from headlamp opening – 16.1", width – 20.3".

B. VENTILATOR KING-SIZE H-D® DETACHABLES™ WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

A. WIND SPLITTER WINDSHIELD – BATWING FAIRING

In the world of functional performance, size does matter. After all, it's simple to understand that the larger the windshield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective airflow management and "wow" styling. The sweeping design complements the shape of the fairing and the inner dash panel and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise and improves your ability to hear the motorcycle's sound system. The rich smoked finish does not interfere with your forward view and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

Tailor your bike to your size and riding style. This reduces helmet buffeting while allowing a view unobstructed by dirt, bugs and rain drops. Harley-Davidson® windshields are formed of hard-coated polycarbonate for strength and scratch resistance and are available in a variety of heights and tints to suit your riding needs.

C. SPORT WINDSHIELD

Combine the mini-shield styling of a wind deflector with a little extra wind protection. This 10.0" Sport Shield features a traditional wind screen shape, but adds a forward "flip" to the trailing edge to deflect the air flow over the rider. You get a shield that's still easy to look over, but without the turbulence usually associated with a short wind deflector. The light-smoke shield is formed from hard-coated polycarbonate for strength and scratch resistance.

-----------------	------------------	-----------------

Fits '14-later Electra Glide, Street Glide and Tri Glide models.

D. BATWING FAIRING WIND DEFLECTOR – MEDIUM PROFILE

Style meets function. This 7.0" tall Wind Deflector splits the difference between the wind deflector and a low windshield, offering sport styling with a little greater wind protection. Harley-Davidson windshields are formed of hard-coated polycarbonate for strength and scratch resistance and the dark smoke tint complements any paint color.

SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you – and your passenger.

TALLBOY® SEAT

SUPER REDUCED REACH® SEAT

LAP OF LUXURY

If your passenger is happy, you'll be happy. Premium passenger armrests have been ergonomically designed to provide the ultimate in passenger comfort. The soft pads provide excellent forearm support on a long ride, and eliminate the passenger's "what do I do with my hands" dilemma.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

TOURING SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

POSITION SEATS

Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

SUSPENSION SEATS

Harley® Hammock and Road Zeppelin® seats provide isolation from road shock with internal fabric or air bladder suspension systems that prevent "bottoming out" to increase rider comfort and endurance.

Seating – Road Zeppelin®

ROAD ZEPPELIN® AIR ADJUSTABLE SEATS

The open road. That's where we developed and tested the revolutionary comfort of the Road Zeppelin® Seat. This remarkable seat removes pressure points and "hot spots" by adjusting the amount of air contained in each bladder within the seat. Easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button to help relieve stress from the lower back, tail-bone or lower extremities. On a long run, occasionally inflating and deflating the air bladders reduces the "numb butt" effect by improving the blood flow to the extremities. So grab a seat. And enjoy the ride.

A. ROAD ZEPPELIN AIR ADJUSTABLE SEAT – '08-LATER MODELS

This Road Zeppelin Seat features two adjustment zones for the rider and one for the passenger and an internal air compressor that adjusts the air level nearly twice as fast as the previous version. The ergonomically-friendly seat design features a narrow front nose for ease of touching the ground at a stop, with a wide seating surface for long range rider and passenger comfort. This seat is a great addition to Trike models too. The easy-to-clean vinyl seat is finished with an embroidered Road Zeppelin logo that lets everyone see that you take riding comfort seriously. This easy-to-install seat accepts a rider backrest and passenger grab rail for additional touring comfort.

COMFORT ON THE GO

Sometimes you need more than your bike to make it a great ride. Tour-Pak® luggage holds plenty of rain gear, extra clothing and basic supplies, while a detachable backrest means a passenger can take on the road with you.

THE RIGHT COMBINATION

PUTTING IT TOGETHER

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

TWO-UP

Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest provides hours of passenger comfort on the open road.

TWO-UP TOUR-PAK® LUGGAGE

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully equipped to go wherever you want, for as long as you want. See you later.

SOLO TOUR-PAK LUGGAGE

Ride like you're on a mission. The saddlebags and Tour-Pak offer tons of storage space and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.

LOAD IT UP

Rain gear, extra clothing and basic supplies are easy to take along when you add luggage to your bike. Designed for maximum versatility, this complete collection of sissy bar- and luggage rack-mounted soft touring luggage ensures you will pack what you need for your next trip.

Designed by riders, for riders, the Premium Luggage Collection is formed of superior heavy-weight ballistic nylon to maintain their shape and protect your belongings over the long haul. And the secure spandex mounting system slips over the passenger backrest for a snug fit.

CHANGING YOUR BACKREST

With a Docking Hardware Kit installed, adding or removing a detachable accessory is a simple "slide and click" proposition. Rotate the cam-lock to release the sissy bar from the rear docking points. Pivot the sissy bar forward and lift it free from the front docking points.

NEVER IN A TIGHT SPOT

On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. So, once you've picked the bike, it's time to choose the suspension that best equips your ride to your personal dimensions.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feelings of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

A. PREMIUM RIDE HAND-ADJUSTABLE TOURING SHOCKS*

Experience the ultimate in superior ride quality with these Premium Touring Shocks. These shocks utilize a single tube, nitrogen charged emulsion design. The design offers enhanced compression and rebound damping compared to the Original Equipment-style air adjustable shocks. This provides a controlled yet plush ride with much less bottoming. Larger chambers (40mm diameter pistons and 14mm rods) allow these shocks to react more quickly to impacts. This keeps the tires tracking while minimizing harshness transmitted through the frame. A simple knob behind the left saddlebag allows the rider to conveniently modify the spring preload via a hydraulic adjuster. Available in Standard Ride Height and Low Ride Height versions.

TOURING SUSPENSION AIR PUMPS

This pump was designed to allow safe and simple adjustment of the front and rear air suspension on Touring motorcycles. Unlike a bicycle pump or a fuel station air hose, the hand-operated pump with controllable "micro bleed" valve allows precise adjustment to air volume, and the "no loss" air connector maintains shock pressure when the fitting is removed. The swivel air hose simplifies valve stem attachment.

C. ANALOG TOURING SUSPENSION AIR PUMP

GENUINE MOTOR PARTS & ACCESSORIES

2015

SCREAMIN' EAGLE®

Screamin' Eagle® Performance Parts give your Harley® motorcycle race-quality performance at street-legal levels. From air cleaners, to engine and exhaust components, they turn heads and raise eyebrows without crossing the line.

LIFE STAGES

If you're not quite sure where to start, the trained professionals at your local dealership stand ready to lend their experience to your velocity needs. They live this stuff, so all you have to do is ask. Just set some performance goals, and they'll hook you up with the corresponding, heart-pumping hardware. These parts will take you where you need to go – fast.

BUILDING A PERFORMANCE BIKE

INTAKE & EXHAUST

Moving more air and fuel through the engine is the easiest (and most cost-effective) way to make more horsepower and torque. A free-flowing air cleaner and matching tuned exhaust will add performance you can feel. Heavy Breather and Stage I Free-Flow Air Cleaners are simple to install and bring a big performance boost for the dollars invested and sweet-sounding Street Performance mufflers deliver power you can feel across a broad RPM range.

STAGE KITS

Screamin' Eagle® EFI Stage Kits offer complete street-legal performance configurations engineered to help you generate specific torque and horsepower gains. Eliminating all the guesswork and trial-and-error testing normally associated with engine modifications, Stage Kits include everything you need to enhance your bike's performance, including big-bore cylinders, high-compression pistons, performance cams and high-flow air cleaners.

PERFORMANCE TUNING

Tuning an EFI-equipped motorcycle for performance is similar to modifying a carbureted model, in that freer-flowing intake and exhaust systems will require more fuel. The Screamin' Eagle Street Tuner provides computer-based tools that record and edit the bike's ECM tuning tables. To optimize drivability and performance, the Street Tuner permits limited tunability within the EPA/CARB-compliant emissions range and records and displays real-time vehicle data on screen.

CAUTION ICONS

-  **GO LIGHT** These Screamin' Eagle products are 50-state street legal for sale and use on all vehicles, including those that are pollution-controlled. Complies with the requirements of 40 CFR Part 86, subparts E and F.
-  **STOP HAND** Harley-Davidson® motorcycles modified with some performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition. Those performance parts identified with a stop hand symbol are U.S. EPA legal, but are NOT legal for sale or use in California on pollution-controlled motor vehicles. California guidelines on tampering can also lead to substantial fines and penalties.
-  **CALIFORNIA** These Screamin' Eagle products are street legal for sale and use on pollution-controlled vehicles in the state of California.

WARRANTY & CAUTION

OVERVIEW

Harley-Davidson has the engineering expertise, sophisticated dyno lab and complete testing facilities to provide enthusiasts with a line of performance products designed to produce good, solid, reliable horsepower and torque. Engine-related performance parts are intended for the experienced rider only.

WARRANTY

Installation of Screamin' Eagle products and similar off-road or competition products from other manufacturers, except some street-legal offerings installed by authorized Harley® dealers, may void your H-D® limited vehicle warranty. Installation of a California performance kit on a 49-state model motorcycle or a 49-state performance kit onto a California model motorcycle will void manufacturer's warranty, as it will not result in a street-legal configuration.

CAUTION

Harley-Davidson motorcycles modified with some Screamin' Eagle high-performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition.

MORE THAN JUST HOT AIR

The sound of a Harley-Davidson® motorcycle grabs the heart and moves the soul. The complete line of Screamin' Eagle® Street Performance Mufflers is tuned to enhance the bass notes and deliver a rich melodic tone from idle to wide-open throttle. These stylish slip-on mufflers produce real-world performance improvements, while maintaining EPA-approved sound levels.

POWER VS. NOISE

A loud exhaust system doesn't mean improved performance. Screamin' Eagle® Street Performance Mufflers are designed to significantly increase airflow and add torque and horsepower you can feel with a twist of the throttle. Engineered to deliver where it counts — during a roll-on pass or on a long run up a steep grade — all street-legal Harley-Davidson® exhaust systems carry the EPA stamp.

The "Room" — a silent chamber lined with perforated sheet metal and 50,000 pounds of fiberglass acoustic wedges — uses a wide array of microphones to get precise readings of drive-by noise. This is the room that creates that world-famous Harley-Davidson sound.

C. SCREAMIN' EAGLE® HIGH-FLOW EXHAUST SYSTEM WITH NIGHTSTICK MUFFLERS

The Screamin' Eagle® High-Flow Exhaust system provides bolt-on performance by reducing catalyst restrictions and improving exhaust flow. Optimized for CVO™ 110 and Screamin' Eagle Stage Kit engine configurations producing 80-100+ HP, the kit replaces the stock head pipe and mufflers with large diameter free-flowing head pipes and matching mufflers. The muffler inlet diameter has been increased to 2.25" to enhance exhaust gas scavenging and the catalysts have been relocated to the mufflers to enhance flow. The proof is in the numbers – this system can produce 5-7 hp gains on a 110ci motor and 8-10 hp gains on a 120ci motor when compared to the Original Equipment exhaust system. Extra oxygen sensor bungs permit attachment of tuning equipment. Kit includes head pipe, 2.25" inlet Nightstick mufflers with catalysts and a collector and crossover tube heat shield. 50-state legal.

Street Tuner

SCREAMIN' EAGLE® STREET PERFORMANCE TUNER KIT

The Screamin' Eagle® Street Performance Tuner is designed to simplify management of street legal performance calibrations as EPA/CARB-compliant performance modifications are made. Once installed, the kit will allow you to upload the latest ECM calibrations for your bike's legal state-of-tune. Start with a high-flow air cleaner and Street Performance mufflers and upload the calibration that provides the best performance mix. Add a Big Bore Stage I or Stage II Kit later and simply download the proper ECM calibration to match the model and hardware. Plus, you have online access to the latest factory calibrations.

The kit includes the Vehicle Communications Interface (VCI) module with on-board memory that can record up to 15 minutes of run-time data. The module will store information on up to 27 variables that can be downloaded to your PC via an optional USB cable, allowing the rider or technician to view and evaluate engine operating parameters. With the included software, you can download and view the bike's air/fuel ratio, O2 sensor readings, engine speed and temperature, RPM and vehicle speed, throttle position, spark advance and many more performance characteristics. The VCI will also record and display service codes for troubleshooting and diagnostics.

The Street Tuner software includes impressive features:

- Smart Tune Live – a dynamic and visual method to track and capture engine data simply by running the vehicle through a range of RPM and Throttle Positions. This feature reduces the time to modify existing VE (Volumetric Efficiency) tables which are then analyzed and tuned. Smart Tune Live works on models with factory-installed O2 sensors only.
- Interpolation of missing data derived from recordings, which reduces analysis time by automatically generating data that might be missed in the recording process.
- Viewable data meters doubled from 4 to 8 allowing users to monitor more real-time data. Users can now save and restore data meter configurations which are viewable in both traditional data modes and the new Smart Tune Live.
- Increased sampling rate to take advantage of the faster ECM data speeds found on select '11-later models (CAN protocol).
- Revised tuning tree with intuitive double click features.

NOTE: Street Tuner permits limited tunability within the emissions range to optimize drivability without compromising emission levels. It also features expanded tuning options outside of the emissions range to optimize performance.

Performance Cams

CHOOSING CAMSHAFTS

Camshafts are a fundamental ingredient in the performance recipe, because they control the timing and duration of all major engine events. They are the primary means by which you can tune your engine's horsepower and torque output. Every cam has unique lift and overlap performance characteristics, which means you need to select cams based on exactly the kind of power you're looking for.

While hot cams, higher-flowing cylinder heads and a free-flowing exhaust system will move the peaks higher up the rpm band, conservative cams may feel stronger to a street rider because the maximum torque occurs at lower rpm. The experts at your Harley-Davidson® dealer have the knowledge, skill and experience to recommend the optimum cam specifications for your riding demands.

SCREAMIN' EAGLE® TWIN CAM PERFORMANCE CAMS

Kits include front and rear cams. Splined rear cam is included for exceptional load handling capability. Gaskets and bearings not included. Dealer installation is recommended and special tools are required for proper installation. All EFI models require ECM calibration.

NOTE: Separate purchase of Cam Spacer Kit P/N 25928-06 is recommended for '06-later Dyna® and '07-later Softail® and Touring models. These kits contain five different spacers to achieve proper sprocket alignment. Individual spacers can be purchased separately.

SE-204 Cam Kit

This midrange torque bolt-in cam produces peak horsepower around 5800 RPM and installation does not require any headwork or performance valve springs. Should be used in conjunction with open intake and exhaust.

25464-06 **\$329.95**

Street legal on '11-'13 103CI Touring and Trike models equipped with Fatshotz Mufflers P/N 80847-10.

SE-254E Cam Kit

This cam provides great low end torque along with good midrange. A good "all-around" cam, the SE-254E is a good match for a light Touring bike – Road King®, Street Glide® or Road Glide® Custom – when the aggressive rider desires a little more top-end horsepower. In a 0-60 sprint or .25 mile drag race, the SE-254E-equipped model would pull ahead of an identical model with an SE-255 cam.

25503-10 **\$329.95**

Street legal on '11-'13 103CI Touring and Trike models.

SE-255 Cam Kit

The ultimate in torque cams, this cam offers substantial increase in low end torque for engines up to 110 cubic inches with compression ratios up to 10 to 1. The low end torque increases are great for heavy bikes or for the person who routinely shifts below 4500 RPM and wants the power available to pass without downshifting. The cam still makes peak power above 5000 RPM so people with lighter bikes will enjoy the torque increases without feeling like the bike runs out of air at higher engine speeds.

25638-07 **\$329.95**

Street legal on '09-'13 Dyna, Softail, Touring and Trike models with 103CI and 110CI engines.

SE-259E Cam Kit

Developed specifically for throttle body EFI systems, this cam has a modern lobe design that allows for higher valve lifts for a given duration. A high-lift version of the SE-211 camshaft, this cam works great with 103 cubic inch and larger engines with free-flowing intake and exhaust. It can be used with stock heads (updated with race springs) and high-compression pistons for even more torque than a SE-211 cam or can be coupled with any of the performance heads to realize the full power potential.

25482-10 **\$329.95**

Street legal on '11-later 103CI and 110CI Touring and Trike models.

Valve Timing Events (SE-266E shown)

TDC = Top Dead Center (piston at very top of cylinder)

ATDC = After Top Dead Center

BTDC = Before Top Dead Center

BDC = Bottom Dead Center (piston at very bottom of cylinder)

ABDC = After Bottom Dead Center

BBDC = Before Bottom Dead Center

SELECTING A CAMSHAFT BY THE NUMBERS

The intake closing point relative to bottom center listed in the table on page 517 can be used as a general indicator for the shape of the torque curve. Earlier intake closing values will result in higher torque at low engine speeds (along with lower horsepower at higher engine speeds). Later intake values will result in higher horsepower at high engine speeds (along with lower torque at low engine speeds).

Intake Closing (degrees ABDC)

Less than 30° Early intake closing indicates a low-speed torque cam.

30° – 50° Medium intake closing indicates a midrange torque cam.

Greater than 50° Late intake closing indicates a high-speed power cam.

A. SCREAMIN' EAGLE® BILLET CAM SUPPORT PLATE WITH HIGH-VOLUME OIL PUMP

A great upgrade for any performance motor. The Billet Cam Support Plate is manufactured from billet aluminum with pressed-in bronze bushings and is pre-assembled with the crankshaft bushing and oil pressure relief valve. Aluminum is specified at 6061 billet plate, heat-treated to T6 specifications with a surface-hardened anodized finish to provide superior strength, rigidity and durability. CNC-precision machining ensures precise dimensions and constant material thickness across the plate, enabling perfect alignment of cams and chains. Cam bushings are made from 660 bronze materials to provide enhanced wear resistance and to stand up to increased loads from the high lift cams common in large displacement motors. The improved Screamin' Eagle® high-flow oil pump provides higher pressure when the oil is hot to keep pressure drops to a minimum and increases the oil supply by 16% and the scavenging by 29% over the '06-later Original Equipment oil pump.

25282-11 **\$429.95**

Fits '06-later Dyna® and '07-later Softail®, Touring and Trike models. Installation requires separate purchase of Cam Service Kit P/N 17045-99D and Drive Gear Retention Kit P/N 25566-06.

A great addition to a high-performance motor or for the rider that tours in extreme temperature conditions, the Screamin' Eagle cast-aluminum oil pan is designed to increase the oil capacity by 1.5 quarts over the Original Equipment pan. Increased capacity means the oil cycles through the engine less frequently and the oil can remain in the pan for a longer period of time. The cast-in internal baffles manage the flow to the oil pickup and keep the hot oil exposed to the heat-conducting ribbed aluminum sump. Kit includes cast aluminum oil pan and pan gasket.

24400099

\$599.95

J. AUTOMATIC COMPRESSION RELEASE

Automatic Compression Release (ACR) valves reduce the strain of starting your high performance motor by reducing cylinder compression – automatically! The engine is easier to turn over, resulting in less wear on your starter and battery. After start, the ACR valves close to restore full compression. ACR gives you peace of mind and protects your investment. ACR can be installed on stock or Screamin' Eagle Performance cylinder heads for all '07-later Twin Cam-equipped models. Installation requires machining to be performed by a competent machinist using the Screamin' Eagle Automatic Compression Release Fixture Kit P/N 94648-08 (sold separately). 524 SCREAMIN' EAGLE®

Clutch & Drivetrain

A. SCREAMIN' EAGLE® TWIN CAM PERFORMANCE ASSIST AND SLIP (A&S) CLUTCH KIT

Developed for the high-thrust 110CI engine featured as Original Equipment on '14-later Screamin' Eagle® CVO™ models, this A&S clutch provides significantly increased torque-handling capacity (115lb/ft). Clutch is designed to improve engagement grip and provides minor slippage during downshifting to reduce shock to the power train. Reduces hand lever pull effort by over 1 pound. Complete kit features improved clutch plates for enhanced wear resistance and is the perfect addition when installing a high-output Screamin' Eagle Stage Kit.

37000026 **\$389.95**
Fits '14-later Touring and Trike models with hydraulic clutch actuator.

B. SCREAMIN' EAGLE VARIABLE PRESSURE CLUTCH

Get more performance from the Original Equipment clutch. The Screamin' Eagle Variable Pressure Clutch is designed to help put the added power from a Screamin' Eagle Stage Kit to the pavement. This bolt-on kit harnesses the centrifugal force of spinning weights to increase the clutch capacity as engine speed increases. The mechanism applies increasing pressure to the stock clutch pressure plate as RPM rises. The result: High torque-handling capabilities without increasing clutch lever effort at idle. The Variable Pressure Clutch also provides smoother clutch disengagement at lower speed. Kit fits behind most stock derby covers with no modifications. See installation manual for additional accessory derby cover fitment information.

To match the performance demands of your engine, team the Variable Pressure Clutch with your choice of clutch diaphragm springs. We recommend the higher capacity Screamin' Eagle Diaphragm Spring P/N 37951-98 for major performance upgrades.

	Lever Effort	Torque Capacity
Original Equipment Spring	Same as stock	120 ft-lbs
SE Spring P/N 37951-98	35% greater than stock	153 ft-lbs

37000121 **\$289.95**
Fits '99-later Evolution® 1340 and Twin Cam-equipped models. Derby Covers P/N 25001-03, 25441-04A, 25770-99, 25331-10, 25339-10, 25700250 and 25700062 require Spacer Kit P/N 37000123. Kit includes Kevlar® fiber-based friction discs and performance clutch spring.

38002-04 \$199.95

Fits '91-later XL and '94-'97 Evolution 1340-equipped models.

H. SCREAMIN' EAGLE PERFORMANCE SLIPPER CLUTCH FOR VRSC™ MODELS

This clutch offers reduced lever effort and improved performance. The unique "slip and assist" ramp system opens the two halves of the clutch hub slightly during high loads to the drivetrain, allowing a moderate slip that reduces shock to the drivetrain during rapid downshifting. The resulting reduction in wheel hop allows maximum contact between the tire and the road in wet or slippery conditions. Clutch lever effort is also reduced by 20% in 1130cc and 30% on 1250cc applications.

37938-08KA \$239.95

B. SCREAMIN' EAGLE MANUAL PRIMARY CHAIN TENSION ADJUSTER

The Screamin' Eagle® Manual Primary Chain Tension Adjuster is a real benefit in those aggressive racing situations where frequent drag racing starts and high rpm speed shifting are part of the riding experience. Ideal for bikes equipped with big displacement high performance (100hp+) engines that are regularly used for track-day drag racing; this Screamin' Eagle Tension Adjuster permits manual selection of primary chain tension. A direct replacement for the Original Equipment automatic version, this anodized billet aluminum adjuster allows you to fine-tune the settings and lock the position when the freeplay is properly set. SCREAMIN' EAGLE® 527

Transmission

F. SCREAMIN' EAGLE® 6-SPEED TRANSMISSION AND GEAR SET

Designed from the ground up, the Screamin' Eagle® transmission incorporates many of the best Original Equipment features, like late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the VRSC™ transmission and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission or as a replacement gear set and can be matched with hydraulic or cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door," forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case and include all necessary installation hardware.

HARLEY-DAVIDSON®
LONGBLOCK PROGRAM

Your engine is the heart and soul of your Harley-Davidson® motorcycle. When the miles start to add up, a Harley-Davidson LongBlock can put the rumble back in your ride simply, quickly, and affordably.

WHY SHOULD I CONSIDER A LONGBLOCK? Unlike an engine rebuild from the repair shop down the street, the Harley-Davidson LongBlock is manufactured from 100% new Original Equipment components, and is built to the latest factory specifications. Engine includes upgraded Screamin' Eagle® lefty crankcase bearing, Screamin' Eagle cam bearings and Screamin' Eagle performance tappets to handle higher stress loads and performance upgrades. In addition, '99-'06 LongBlocks are upgraded with late-model hydraulic cam tensioners, high-volume oil pump and billet cam plate. '07-'13 103CI and 110CI engines feature factory-installed Automatic Compression Releases.

WHAT DOES THE H-D® LONGBLOCK INCLUDE? The crankcase is pre-assembled with flywheels, connecting rods, bearings, seals, cylinders, pistons, rings, heads, valves, valve springs, tappets and pushrod covers. Also included and ready for Dealer installation are top end rocker arm supports, rocker arms and shafts, pushrods, and breathers. The LongBlock also includes cam support plate, cam plate bearings, cam and timing chain drive, hydraulic tensioners and all required gaskets and new hardware.

ARE UPGRADES AVAILABLE?* You can choose silver or black-highlighted engines to match your styling direction. Bikes originally equipped with Twin Cam 88 engines can upgrade to 95 or 103CI displacement, and Twin Cam 96-equipped models can be repowered with 103 or 110CI engines, based on specific model fitment. Upgrades require model-specific ECM recalibration (sold separately).

WHAT ELSE DO I NEED? LongBlock is sold without cam shafts, lower rocker boxes, upper rocker box covers, or cam cover. You have the option to re-install your current cams and covers, or select from a wide assortment of performance and custom engine cover options.

FAST AND EASY: Just take your Harley motorcycle to your authorized dealership. They will remove the engine from the frame, ship the left crankcase half to Harley-Davidson, and in a short time, you will have a new LongBlock back, ready for the dealer to reinstall in your bike. Your engine retains its original Vehicle Identification Number (VIN) for easy title exchange and registration.

**Displacement upgrades are available for vehicles previously equipped with street compliant big bore kits only.*

ENGINE TRIM

The jewel of every Harley-Davidson® motorcycle is the V-Twin engine that sits so beautifully at its heart. Make it even more of a conversation piece with the addition of a custom cover, classic chrome hardware, or some eye-catching trim.

536 ENGINE TRIM

Burst Collection

THE BURST COLLECTION

Split with tradition. The Burst Collection takes your ride in a new hard-edged direction. With a rich mixture of tuxedo black and machined aluminum finishes, each component in this complete collection is designed to tie the look together. The combination of contrasting edges and the light-enhancing machined pattern makes a powerful visual statement that complements classic and contemporary customizing styles. The Burst Collection components create an impact all by themselves, but can also be seamlessly combined with Edge Cut and other gloss black accessories to complete the look.

A. THE BURST COLLECTION ENGINE COVERS

The Twin Cam engine is the focal point of your motorcycle, so dress it with pride. Burst Collection Engine Covers set the stage for a complete custom look. We start with beautifully polished cast or billet parts that are engineered to fit the bike perfectly. Then we apply a rich “tuxedo black” anodized finish and meticulously machine away the surface to expose the satin aluminum below. Start with a couple of components, or go all the way. The components replace the Original Equipment covers for superior fit. Complete the look with gloss black primary and transmission top covers (sold separately). Kits include chrome hardware.

25700249 Cam Cover. **\$204.95**
Fits '01-later Dyna®, Softail®, Touring and Trike models (except '01 EFI Touring).

Installation on '06-later Dyna and '07-later Touring, Trike and Softail models require separate purchase of Gasket P/N 25416-99C.

25700251 Rocker Box Covers. **\$279.95**
Fits '99-later Touring and Trike models. Sold in pairs.

34800012 Transmission Side Cover. **\$204.95**
Fits '08-'09 FXDF, '10-later Dyna and '07-later Softail (except FXCW, FXWC and FXSB) and Touring models. Does not fit models equipped with hydraulic clutch activation.

B. THE BURST COLLECTION PERFORMANCE AIR CLEANER KIT

Performance and style combined. Designed to complement the Burst Collection, this radical low profile air cleaner features a “tuxedo black” surround that has been expertly machined to expose the satin aluminum finish below. The billet cover conceals a one-piece cast back plate with integral breather and mounting bracket that promotes smooth air flow into the throttle body. The exposed reverse cone synthetic element provides high-volumes of air, and the element is washable for maximum efficiency and protection. The complete kit includes Burst Collection trim, backing plate, air cleaner element, and all required installation hardware. All EFI-equipped models require ECM calibration* (priced separately).

29000066 **\$374.95**
Fits '08-later Touring and Trike models with Original Equipment 50mm throttle body or with Screamin' Eagle Street Performance Big Bore Stage 4 Kit P/N 92500011 or 92500020.

Oil Coolers – Big Twin

PREMIUM OIL COOLER KITS

This oil cooler was designed specifically for Harley-Davidson® to out-perform all other coolers in the industry. The cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. The oil cooler has been designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. The kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Thermostat activates at 185°F (85°C). Kit comes complete with mounting hardware and precut oil lines.

Inside View of Premium Oil Cooler with Turbulators

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Inside View of Conventional Oil Cooler without Turbulators

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

CONTROLS

Get a grip on style with custom controls from hand to foot. A new handlebar can make all the difference in rider comfort, while grips, hand controls, footpegs, and mirrors can provide the extra styling touches you're looking for.

AT ARM'S REACH

From a rider's perspective, the hand controls are one of the most visual parts of the bike. They are the first thing you touch when you drop into the saddle, and what you see every mile you ride. That makes your controls a prime candidate for special treatment. Designed to put an integrated look just a few wrench turns away, installing one of our hand and foot control collections is a solid first step to an all-out custom journey.

Shaped for maximum comfort, Get-A-Grip™ hand grips are available in your choice of standard or magnum diameters to comfortably accommodate almost any size hand. And you don't need to sacrifice style for comfort. Designed to accent any customizing direction, the mirror-chrome or gloss black finishes complement both traditional and contemporary looks. Hand Grips – Heated

HEATED HAND GRIPS

Keep comfortable on those cool mornings or frigid night rides. Warm hands have a major impact on overall body comfort and sometimes gloves just aren't enough. These thermostatically controlled grips feature variable heat settings controlled with a military grade resistor and use automatic temperature monitoring to adjust to ambient temperatures. With both hands on the grips, they will remain at a constant temperature regardless of changes in outside temperature. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount and the grips are switched on/off with the ignition to avoid draining your battery. The "glueless" grip design allows grip removal if you change handlebars or motorcycles.

A. HEATED HAND GRIPS – SLIPSTREAM

Slipstream Grips have been thermally mapped to provide a more uniform heat and are designed to achieve a maximum operating temperature approximately 20° Fahrenheit warmer than previous accessory heated grips for added warmth during cold rides.

56100027 \$269.95

Fits '08-later Touring and Trike models (except CVO™). '14-later Touring and Trike models require separate purchase of Electrical Connection Kit P/N 69200722. Not for use with internally wired handlebars.

56100030 \$259.95

Fits '96-later VRSC™, XL, XR, Dyna®, Softail® (except FLSTNSE, FLSTSE2/3, FXDB and FXSBSE) and '96-'07 Touring models. '14-later XL, '12-later Dyna and '11-later Softail models require separate purchase of Electrical Connection Kit P/N 72673-11. Not for use with internally wired handlebars.

B. HEATED HAND GRIPS – STREAMLINER

Complement the Streamliner look with these matching grips. The rich black rubber provides a positive grip while riding and the chrome tri-line design will provide just the right touch of chrome. These grips have been thermally mapped to provide a more uniform heat and are designed to achieve a maximum operating temperature approximately 20° Fahrenheit warmer than previous accessory heated grips for added warmth during cold rides.

56100047 \$269.95

Fits '08-later Touring and Trike models (except CVO). '14-later Touring and Trike models require separate purchase of Electrical Connection Kit P/N 69200722. Not for use with internally wired handlebars.

COMFORT, STYLE OR BOTH?

Every person is unique. Your overall height, arm reach, upper body length and riding style all dictate your relationship to the bike's controls. Add in the desire for a unique, custom look and your handlebar options multiply exponentially.*

CHOOSING YOUR HANDLEBAR

RISE is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit too low can help put hand grips into your sweet spot.

PULL BACK is the distance the handlebar tips come back toward the rider. Greater pull back can eliminate the long reach to the bar for a shorter rider.

WIDTH is measured from tip-to-tip. Make sure the bar isn't too wide so it pulls your hands off the grips when turning.

KNURL CENTER is the distance between the centerline of the bar's knurling. The measurement should match the riser dimension to maximize clamping pressure.

YOUR RIDING POSITION

DRAG HANDLEBAR

Narrow, flat and more aggressive, drag bars provide a straight elbow and neutral hand and wrist position. For maximum comfort, drag bars can be positioned with curved or straight risers to minimize stretch to the controls.

APE HANGER & TALLBOY® HANDLEBAR

Tall and wide, ape hanger and Tallboy® handlebars provide a classic "fists-in-the-wind" look and can add long-haul comfort for riders with long arms. Because handlebar height is regulated in many areas, check local laws before installing a tall handlebar.

BEACH HANDLEBAR

Low and wide, a beach bar spreads your arms and gives you room to breathe. Ideal for the rider with long arms, beach bars can be a little too wide for many riders. While selecting a bar, make sure you can reach the hand controls when the handlebar is fully turned.

FIT SHOP TIPS

Your Dealer can help you with this simple experiment and recommend a handlebar that matches your ideal riding position. For more information, visit h-d.com/fitshop.

To get an idea how well your bike fits you, you can try this simple test. Block your bike so that it is level and stable, sit on the bike in your normal riding position and let your hands and arms hang down at your side. Now, close your eyes and reach out to where you think your ideal handlebar should be. With your hands grasping an imaginary handlebar, place them where they feel the best... that is, rotate your wrists to a natural position and spread your hands to a width that feels comfortable. Now open your eyes. This is where your bike's hand grips should be.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake hose for some models. Handlebar height is regulated in many areas. Check local laws before installation.

RIDER BASICS

You may think you are perfectly happy with the way your bike is adjusted. But that doesn't mean that it is correctly set up for you. We get used to our bikes – our muscles become trained and we end up accommodating the bike. It is far better to take the time to make the bike accommodate you.

If you are satisfied with your handlebar's width and wrist position, but wish it was just a little higher, lower or closer to you, your dealer can recommend a set of handlebar risers that move the bar into your comfort zone.

ADJUSTING YOUR HAND POSITION

STOCK HANDLEBAR

Just about every model of Harley-Davidson® motorcycle comes with a different stock handlebar. Selected to complement the style of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

STOCK HANDLEBAR WITH RISERS

If the stock handlebar has the correct width and hand position for you, but seems just a little too far away, we offer riser kits that bring the controls within reach. Straight and curved risers are available for many model and handlebar combinations.

FIT SHOP TIPS

Here are a few options to consider when outfitting your bike to fit you. Find your model and flip to the pages for more information. For more details, visit h-d.com/fitshop.

Getting the fit right may be as simple as adjusting the Original Equipment handlebar and controls. With the bike blocked in the upright position and you in the saddle, your Dealer can loosen the handlebar clamp and rotate the bar for a closer match to your ideal fit.

Once the grips fall naturally to hand, your Dealer can also adjust the hand control lever position. Rotating the switches and levers to a level position puts your wrists in a relaxed position and reduces the strain of lifting your fingers to reach a too-high lever.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake hose for some models. Handlebar height is regulated in many areas. Check local laws before installation.

F. BOOM!™ AUDIO AMPLIFIER KIT

Take your music to the streets. Boom! Audio Amplifier Kits allow you to crank up the volume with significantly less distortion. The amplifier provides more power than Original Equipment radio alone, resulting in increased volume, fuller sound reproduction, reduced clipping and lower Total Harmonic Distortion (THD) than head unit alone. Unlike after-market amplifiers that connect between the radio and the speakers, the Boom! Audio amplifier bypasses the radio's internal power amp to produce the cleanest sound possible. The Boom! Audio Amplifier boosts the pure source signal, minimizing any distortion generated through the speaker output. The system-matched high-output signal features optimized sound equalization for crisp, clear vocals and maximum bass response and the strong midrange response cuts through wind and road noise. The waterproof 4-channel, 75-watts/channel amplifier (300-watt total) has been designed from the ground-up for the harsh motorcycle environment. Kit includes all mounting hardware and wiring harness. Note: The use of the Boom! Audio Amplifier turns off the radio's internal amplifier. Installation of a third or fourth set of speakers requires the Boom! Audio Speaker Expansion Kit.

LIGHTING

Where riding is concerned, brighter is always better, from euro-inspired LED projector beam headlamps to high-visibility brake lights. And when it comes to style, nothing brightens the boulevard like Genuine Motor Accessories auxiliary lighting.

A BRIGHT IDEA

Whether you want to grab a little more attention on the boulevard or light up the dark desolate highway, Harley-Davidson® LED lighting will get you noticed.

Available for most models, LED headlamps feature high- and low-beam performance that provides a focused beam of light down the road and a pool in front of the motorcycle. Solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assemblies mount into existing housings for easy installation.

DARE TO COMPARE

Harley-Davidson® LED Headlamps offer low- and high-beam performance that is superior to traditional halogen bulbs. The wide curb-to-curb low-beam pattern provides a great around-town view and the projector high-beam adds extra punch down the center of the lane.

LED performance characteristics you can see:

- 1 Clarity and direction of beam
- 2 Brightness and depth of light
- 3 Focused or wasted light
- 4 Full coverage or gaps in light
- 5 Curb-to-curb coverage
- 6 Illumination of reflective markings

DAYMAKER™ LED LAMPS

Cut through the night. Harley-Davidson® LED Lamps are brighter and whiter in color and provide a superior light pattern over standard incandescent lamps. Compared to the yellow light of a traditional halogen bulb, the LED lamp produces a Daylight Color Impression that appears more natural to the user. Headlamps feature horizontal “D-shaped” lenses that focus light into a pool in front of the motorcycle and separate high beam and low beam projector lenses that provide a focused beam of light ahead. Lamps are available in your choice of brilliant chrome or gloss black background to match your styling direction. The solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assembly mounts into existing light housings. Installation is quick and easy and the plug-in lamps connect to the factory headlamp wiring.

Headlamps – Auxiliary

A. DAYMAKER™ REFLECTOR LED FOG LAMPS

Compact 2.5" bullet-shaped reflector-optics fog lamps produce a bright white pool of light near the vehicle and fill in the dark area between the bike and the low-beam pattern. Unlike some traditional fog lamps, the low-draw LED lamps do not burden the bike's electrical system. The long-life solid-state LED lamps are sealed in shock and vibration-resistant housings that mount to the engine guard for a clean appearance.

STEP INTO THE LIGHT

Believe it or not, chrome isn't the brightest accessory you can use to customize your ride. Harley-Davidson® offers a variety of lighting options that can add the perfect finishing touch to nearly any part of your bike.

This Road King® Classic model is equipped with amber Electra Glo™ Rider Footboard Inserts, an amber Electra Glo Light Pod Starter Kit and four Light Pod Expansion Kits.

A. ELECTRA GLO™ LIGHT POD KIT*
Light up the night. These compact LED Light Pods radiate a neon-like glow to accent almost any part of the motorcycle. Featuring a solid-state circuit board sealed against the weather, these self-adhesive lights can be placed under the tank, behind the air cleaner or almost anywhere your imagination takes you. Electra Glo™ LED lighting draws minimal amperage, allowing lights to be left on for hours when parked. Light Pods connect directly to the motorcycle wiring harness and the one-way wiring simplifies installation.

The complete kit includes 6 light pods, basic wiring in a selection of lengths, adhesive wire ties and a compact on/off switch with rheostat to control the lighting intensity. Available Expansion Kits provide plug-in installation of additional lighting.

Fits all models. Lights are intended for display use only. Some local regulations prohibit using colored lights during vehicle operation on public streets.

B. ELECTRA GLO FOOTBOARD INSERTS – RIDER

B. ELECTRA GLO™ FOOTBOARD INSERTS

Attract a crowd. The Electra Glo™ Footboard Inserts feature a molded rubber insert that appears to be charcoal black in normal operation, with a mirror-chrome surround and Bar & Shield logo as a finishing touch. But when the bike is parked and the ignition is turned to the accessory setting—watch out. The surface explodes with brilliant LED lamps, washing the surface in light and reflecting off of the chrome engine and exhaust trim. The effect is magical and hard to match with “neon” strips. Available with blue, red, purple or amber LEDs, the colors are tinted to match the available Electra Glo Light Pods. Inserts fit traditional D-shaped footboards and are easy to install with pre-terminated wiring that plugs into the factory harness. No cutting or splicing is necessary.

NOTE: Some local regulations prohibit using colored lights during vehicle operation on public streets. May not conform to local lighting regulations.

Separate Hardware Kit is required when installing nacelle with passing lamps or rigid mount windshield.

GENUINE MOTOR PARTS & ACCESSORIES

2015

WHEELS

Nothing changes the overall look of your Harley® motorcycle quite the way a set of custom wheels can. From classic laced to contemporary forged models, you'll be rolling down the road with a whole new level of pride in your ride.

STRENGTH AND STYLE

From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile and set the styling direction for the whole bike. Choose wisely. Harley-Davidson® forged, cast and laced wheels undergo thousands of hours of real-world testing to meet the highest standards of performance and durability.

SEEING THE DIFFERENCE

MIRROR CHROME

Looking for the ultimate flash? Choose Mirror Chrome wheels. To achieve this rich look, our dedicated team of polishers spends hours preparing the wheel for its finish. All visible wheel surfaces are micro-polished to a glass smooth finish and special masking is applied to prevent contamination to threads and bearing bores.

CONTRAST CHROME

Can't make up your mind? Choose Contrast Chrome wheels. We start with a hand polished wheel and add a proprietary finish that features both gloss black paint and chrome highlights. The combination produces a stunning contrast that lightens the wheel's profile by visually thinning the spokes, rim and hub.

BLACK ICE

Want the blacked-out look but unwilling to give up the shine? Choose Black Ice wheels. First, we polish all the surfaces. Then we apply the exclusive Black Ice coating for a finish with incredible depth and shimmer—impossible to achieve with ordinary “black chrome.” These wheels look perfect on a blacked-out bike, but the wet-look holds its own in the company of chrome.

CUT BACK

Looking for a cool, hard-edged style? Choose Cut Back wheels. We start with a raw wheel, polish all the exposed surfaces and coat the wheel in a durable easy-to-clean gloss black finish. But we don't stop there. We machine an intricate pattern into the wheel to the raw aluminum surface below. The resulting exposure of machined edges add a tough look to your ride's profile.

ORDERING PROCESS

Step 1: Select a wheel part number for your specific fitment.

Step 2: Select the wheel installation kit for your specific application (model, year and front or rear). Note: If your model is not specified in the wheel fitment, a wheel installation kit will not make the wheel fit your model.

Step 3: Refer to the instruction sheet included in your wheel kit to determine the necessary parts required from the installation kit.

Step 4: Use only Harley-Davidson® specified tires. See a Harley-Davidson dealer. Using non-specified tires can adversely affect stability, handling or braking, which could result in death or serious injury.

WHEEL INSTALLATION KITS

Once you select your wheel style, select the Wheel Installation Kit designed specifically for your motorcycle. Kit includes the bearings and spacers required for installation.

COLOR SHOP & CUSTOM SEATS

Make a big, bold personal statement with a Color Shop custom paint set and matching custom-stitched seat. You'll appreciate your choices every time you flip on the light in your garage – and sense the stares of strangers as you roll on down the road.

ARTISTRY IN STEEL AND LEATHER

Think of the bike as a blank canvas, a surface ready to express your personality with design, color and texture. A Harley-Davidson® Color Shop paint set and a complementing custom seat establish the tone for the rest of the accessories and set your bike apart from the crowd.

COLOR SHOP CUSTOM PAINT

No surprises. Pick your style — and we deliver a custom stand-out look without the one-off custom worries. We handpick our artists and continually monitor their painting techniques and finish quality. Every unique set will have subtle differences associated with the artist's hand, but you will know from the start what the finished look will be.

COLOR SHOP CUSTOM SEATS

We believe customizing your seat shouldn't be a painful process. So we do away with the hassles. You can actually "test sit" a Brawler® or Sidekick® seat at a Harley-Davidson® dealer. You select from over 1,300 design options and visually build your seat on the web to eliminate the design guesswork. And you don't need to send your seat across the country and hope you get it back before the riding season is over.

CUSTOM SEAT OPTIONS & ORDERING

DESIGN IT YOURSELF

We make it simple. Log on to design your seat and watch it come to life. Select the pattern, the inlay and the color, then bring the specs to your dealer and have your seat in hand in just three weeks. Your dealer has a useful swatch book of all inlay materials and stitching options to help you make your choices.

To get started, visit www.h-d.com/customseat

STEP 1: SELECT A SEAT

Choose from the Brawler® solo or the Sidekick® two-up seat.

STEP 2: SELECT A STITCH PATTERN & COLOR

Choose from eight different flame, skull or tribal designs, stitched in your choice of ten different colors that complement your bike's paint and pinstripes.

STEP 3: SELECT AN INLAY MATERIAL & COLOR

Embossed leather inlays are available in ten colors and styles to match your bike's personality.

STEP 4: PRINT IT OUT

Print out your design, take it to your Harley® dealership and you'll have your seat in just three weeks.

SELECT A SEAT

Available in Brawler® solo and Sidekick® two-up designs, these custom saddles are styled to accent the lines of many Sportster®, Dyna®, Softail® and Touring models. Shaped from premium open-cell polyurethane foam, these seats provide maximum rider support, without being "too hard." The fiberglass seat pan adds strength and flexibility and the felt-covered underside protects the paint and bodywork. The high-quality fine-grained leather seating surfaces provide ultimate comfort and the vinyl side panels add flexibility and durability for the long haul.

CUSTOM BRAWLER® SOLO SEAT

When it's time to go it alone, go solo in style. This premium quality cowhide leather saddle is designed to create a low and lean look.

COLOR SHOP LIMITED CUSTOM PAINT

It's hard to believe this look is available directly from the factory. The Motor Company commissions only a handful of custom designs each year. Each hand-painted set has been lovingly created by a small team of artists and specialists, exercising their vast skills to deliver depth and dimension unknown in production paint. And because Harley-Davidson hand-picks our custom painters, we can stand behind each Limited Series paint set with an unmatched 2-year Harley-Davidson® warranty when installed under the Custom Coverage Program.

Color Shop Limited Series paint gets you the stand-out custom looks you crave, without the guesswork and anxiety when having your bike painted by a local body shop.

COLOR SHOP LIMITED SERIES—ARCTIC FLASH

Come towards the light. Like the great northern lights, waves of white dance against the black night sky as the last red streaks of the setting sun illuminate the horizon. Solar winds move the curtains of light across the flanks of the bike to magnetically draw your eye from one end to the other. Limited availability – only 150 sets will be offered. Sets ship November 2014. See your dealer today.

The fine airbrushed shadows add depth and dimension and leave the impression of shimmering heat rising from the cold background. Limited availability – only 150 sets will be offered. Sets ship December 2014. See your dealer today.

COLOR-MATCHED STRETCHED SADDLEBAG BOTTOMS*

Add the long low “slammed” look to your Touring bike without compromising the suspension travel and ride height. These Stretched Saddlebag Bottoms wrap around the exhaust to add visual length to the bike and hide the muffler bracket and hanger from view. Stretched Bottoms are predrilled to accept your existing saddlebag lids and latches. Simply attach the extended saddlebag bottom to your saddlebag lids with the included hardware and install on the bike like the original bags.

Available to fit:

Fits '14-later Touring models with Color-Matched Hard Saddlebags.

Fits '93-'13 Touring models with Color-Matched Hard Saddlebags.

GENUINE MOTOR PARTS & ACCESSORIES

2015

GARAGE

While it's tempting to use "auto parts store" cleaning and service supplies, hold out for the real thing. Harley-Davidson® oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your motorcycle will encounter.

MORE THAN AN OIL CHANGE

Harley-Davidson® dealers will service your motorcycle with factory-approved methods and equipment. Dealership technicians are specially trained and use advanced technologies to properly diagnose and maintain your bike. Whether it's your first 1,000-mile checkup, 20,000-mile service or anything in between, your dealership should be your service destination.

THE WELL-EQUIPPED GARAGE

Adventure always comes at a price, especially for a motorcycle. The sun, moisture, bugs and road debris can take their toll on the bike's external and internal finishes. But, if you have the right tools for fighting through miles and miles of the highway's abuse, you'll be more than ready to ride for years.

FLUIDS
Whether it's oil, brake fluid or Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant, all Harley-Davidson® fluids are developed exclusively for use in Harley-Davidson motorcycles, making them a must-have in your garage.

STORAGE
Premium motorcycle covers, bike lifts and wall-mounted detachable storage units protect your bike and keep your garage organized.

TOOLS
Every bit as rugged as our motorcycles, Harley-Davidson tools and tool kits boast a compact, lightweight design developed specifically for use on your Harley.

BATTERIES
Genuine H-D® Batteries feature AGM technology for higher cold cranking amps, longer life and improved rechargeability.

LOCKS
Secure your Harley with street-proven cables, anchors and locks designed specifically to deter and prevent motorcycle theft. Go one step further and add a factory security system or universal alarm for even more peace of mind.

FILTERS
Don't overlook the essentials. Harley-Davidson air and oil filters keep debris out of your engine and help keep it healthy. So replace them routinely and insist on using only the genuine article.

CLEANING TIPS FROM THE MOTOR COMPANY

We understand how important a clean ride is to you. That's why we've spent thousands of hours formulating cleaning and care products designed specifically for H-D® surfaces and finishes. Unlike common "auto parts store" brands, these products are designed to protect your investment and will work together without adverse reactions.

CHECKLIST FOR COMMON CLEANING ISSUES:

- ☒ Before applying any protective or cosmetic product, you should always start off by washing your motorcycle with Sunwash® Bike Soap.

☒ Don't detail your bike in the direct light of the day. Sun-warmed clearcoat and hot surfaces may streak and swirl when drying.

☒ To soften melted-on boot marks and tar from exhaust pipes, apply Boot Mark Remover and let it set for a few minutes. Then scrape away the gunk with a Soft Cloth.

☒ The natural acid in bug splatter is damaging to surface finishes, so be sure to act quickly. Apply Bug Remover, wait a minute to soften the residue, and rinse away the debris.

☒ To remove adhesives, tar, tree sap and pollutants, dab on Glaze™ Poly Sealant, wait, then wipe it clean with a Soft Cloth.
- ☒ Is your leather looking dull? Black Leather Rejuvenator's pigmented formula restores the luster and Leather Protectant weatherproofs the surfaces.

☒ Whitewalls a little dirty? Apply Harley® Wheel & Tire Cleaner with the Soft Detailing Pad to make them gleam.

☒ To revive dull seats, inner fairings and plastic surfaces, mist on Trim Cleaner and wipe away the dust and grime.
- ☒ To protect plastic, painted, and chrome-plated surfaces, apply Glaze Poly Sealant. This cream combats fading and oxidation and its ultrafine leveling agent removes minor blemishes.

☒ Don't have time for a complete detailing session? Use Harley Gloss or Harley Spray Cleaner & Polish for quick jobs between applications of Glaze Poly Sealant.

D. COMPACT AIR COMPRESSOR WITH LIGHT

Correct tire pressure is crucial to safe operation and long tire life, but checking the pressure, finding a gas station with a working air pump, and filling the tire is a chore that many of us ignore. Compact Air Compressor is designed to simplify this necessary procedure. The compact, lightweight 12V pump is designed for life on the road. The all-in-one pump plugs into your bike's battery charging harness, and features a built-in 0-160 psi pressure gauge and bright LED work light. The 11" air hose and 6' fuse-protected power cord easily reach the front and rear wheels, and are stored in convenient compartments when not in use. The lightweight pump features durable, impact-resistant construction, and is small enough to fit easily in a saddlebag or strap-on luggage. Kit includes pump, valve stem extension, and nylon carrying bag.

E. VALVE STEM EXTENSION

Sometimes there's just not enough space around the tire's valve stem for the gas station air chuck and hose to reach. Brake rotors, sprockets and saddlebags get in the way and keep the air chuck from making an airtight seal. When that happens, this Valve Stem Extension provides easy access. Simply screw the extension in place on the stem, fill the tire to the proper pressure, remove the extension, and replace the valve stem cap. Then toss the extension in your saddlebag or tool roll for the next time.

F. COMPACT TIRE GAUGE AND TREAD DEPTH INDICATOR

Combination dial air pressure and tread depth gauge provides easy access to the valve stem. A durable internal diaphragm provides accurate air pressure readings with a dual range indicator for 0-60 psi and 0-400 kPa readings. The pressure relief valve is activated by a push button to eliminate inner gauge air pressure after use. The integrated tire tread depth gauge features a dual-range color-coded indicator, calibrated in 1/32" (0-14/32") and millimeters (0-11mm), for monitoring tread wear. A protective rubber boot covers the housing to protect the gauge from impact and abrasion.

ENGINE OIL FAQ'S

HOW OFTEN SHOULD I CHANGE MY MOTORCYCLE ENGINE OIL?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants during this time period.

CAN I GO LONGER BETWEEN OIL CHANGES BY CHANGING THE FILTER?

NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

WHAT VISCOSITY GRADE SHOULD I USE IN MY HARLEY MOTORCYCLE?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson® Motor Oil. SAE 10W40 H-D® Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

SYN3® ENGINE, PRIMARY AND TRANSMISSION OIL FAQ'S

WHAT ARE THE KEY BENEFITS TO USING SYN3 MOTORCYCLE LUBRICANT?

- SYN3® Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature stability, and superior overall field performance.

WHAT'S THE DIFFERENCE BETWEEN SYNTHETIC AND PETROLEUM-BASED LUBRICANTS?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

WHAT DOES SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT DO FOR MY DRIVETRAIN?

SYN3 Full Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

WHEN CAN I START USING SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT?

Right away. SYN3 Full Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

SINCE SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT IS A HIGH-PERFORMANCE LUBRICANT, CAN I WAIT LONGER BETWEEN CHANGES?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3 Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

Terminal construction ensures solid watertight connection with standard or performance spark plug wires.

Built-in suppressor/resistor reduces radio noise and interference.

Plated jacket helps prevent corrosion in harsh weather and temperature conditions.

RCT (Ribbed Core Technology) provides improved resistance to plug fouling. The rib's proximity promotes spark discharge to the shell on plugs that are starting to foul, allowing the air/fuel charge in the cylinder to ignite and clear the plug.

Fine Wire Center Electrode promotes ignitability and enhances start up.

Platinum pads on both electrodes reduce gap erosion for longer plug life.

"V-trimmed" ground electrode reduces shrouding to promote flame propagation.

A. SCREAMIN' EAGLE ST PERFORMANCE SPARK PLUGS

A. SCREAMIN' EAGLE® ST PERFORMANCE SPARK PLUGS

Screamin' Eagle® ST Spark Plugs feature double platinum coating for superior erosion resistance and extended life. The "V" trimmed ground electrode reduces shrouding of the flame front to promote flame propagation, and the fine wire center electrode enhances start ups and ignitability. Screamin' Eagle ST Plugs feature Ribbed Core Technology (RCT) that provides resistance to fouling, and are designed with Original Equipment-style noise suppression to prevent electrical interference with radios and CB communication equipment. Works great in racing applications where rich air/fuel conditions are required. Unique style with Screamin' Eagle logo. Sold in pairs.

High Compression Applications

These plugs are designed for high performance applications involving modifications in high-flow air cleaners, camshafts, exhaust, performance heads, ignition components, higher compression ratios above Original Equipment configurations or engines specific for racing applications.

B. HARLEY-DAVIDSON GOLD SPARK PLUGS

A special thread and shell coating ensures quick and easy removal from aluminum heads and resists corrosion. A gold palladium insert extends life and improves resistance to corrosion. The tapered tip provides better spark exposure to air/fuel mixture and allows the mixture to flow more easily through gap area for maximum combustibility. Fouling resistance is improved with smaller diameter center electrode wire and insulator tip. Plus, a copper-cored ground electrode runs cooler for extended life.

D407/D408 TOURING

The D407/D408 tire is constructed for '09-later FL Touring, select Softail® and specific Custom Vehicle Operations™ (CVO™) models and is available exclusively through Harley-Davidson Dealers. The FL Touring rear tires feature Dunlop's advanced MT (Multi-Tread) technology.

- Tire features bold "Harley-Davidson" script on the sidewall.
- MT Multi-Tread rear tire incorporates a tough tread compound in the center that runs cooler to provide stability, excellent traction under braking and long life and to each side is a section of lateral-grip compound that enhances traction at higher lean angles for great grip while cornering.
- Reinforced multi-layer tire carcass gives the tire strength for long life and provides stability at highway speeds and maximum lean angles.
- Bold, angled lateral grooves in the tread pattern evacuate water from the contact patch on wet roads.
- The D407/408 is available in blackwall, slim white and wide-white sidewall styles.

D402 TOURING

Built with a three-ply polyester casing with two fiberglass belts, the D402 offers greater load-carrying capacity and stability.

- Computer-optimized tread profile with offset center groove improves rider confidence over rain grooves and steel-grated bridges, while reducing cupping for even wear.
- The D402 is available in blackwall, slim whitewall, wide whitewall and engraved wide whitewall styles.

ONE-YEAR OVER-THE-COUNTER PARTS AND ACCESSORIES WARRANTY

Harley-Davidson warrants that street legal Genuine Motor Parts ("Parts") and street legal Genuine Motor Accessories ("Accessories") that are purchased on or after January 1, 2012 through an authorized dealer will be free from factory defects, under normal use and service, for a period of one year starting from the date of retail sale and delivery (not date of installation). Because this limited warranty covers only Parts and Accessories, labor is not covered. This limited parts warranty does not cover defects or damage due to abuse, misuse or improper installation. This parts warranty applies to Parts and Accessories you or an aftermarket shop have installed, but only for defects in manufacturing—not conditions caused by the improper installation.

This Parts and Accessories warranty is separate and distinct from the limited factory warranty that applies to your stock motorcycle. This Parts and Accessories warranty does not extend or modify the factory warranty that applies to your motorcycle. It only covers the street legal Genuine Motor Parts and street legal Genuine Motor Accessories added to your motorcycle.

This Parts and Accessories warranty does not cover defects, damage or premature wear to your motorcycle that are caused by the installation or use of Parts and Accessories, even those installed by an authorized dealership. Examples include, but are not limited to performance-enhancing powertrain components or software, exhaust systems, non-approved tires, lowering kits, handlebars, add-ons connected to the factory electrical system, etc.

The fact that Parts or Accessories are labeled or branded Harley-Davidson, or are sold or installed by an authorized dealership, does not necessarily make them appropriate or warranted for the make and model of your motorcycle. The use of Parts and Accessories not designed and tested for your motorcycle may have negative consequences on the performance of your motorcycle and may create conditions not covered by the limited factory warranty.

The remedy for breach of this limited Parts and Accessories warranty is expressly limited to the repair or replacement of any component that proves to be defective, and does not extend or create liability for consequential damages, costs or expenses, including loss of time, inconvenience, or loss of use of the motorcycle. Any implied warranty, including warranty of merchantability or fitness for a particular purpose, is expressly limited to the duration of this limited one-year Parts and Accessories warranty, or to the shortest duration permitted by the laws in your state.

EXCLUDED COMPONENTS:

All Genuine Motor Parts & Accessories will qualify for the one-year over-the-counter warranty, with the following exceptions:

- Tires
- Chemicals
- Premium Luggage (two years)
- Audio and Navigation (two years where applicable)
- Non-street legal components (including Screamin' Eagle® Pro)
- Anything with a manufacturer/factory warranty
- Other disposable and consumable items

To obtain warranty service, return the affected component(s) with proof of purchase, at your expense, within the limited warranty period to an authorized Harley-Davidson® dealer.

Harley-Davidson Parts and Accessories Division, a facility of Harley-Davidson Motor Company, is registered to International Quality Standard ISO 9001:2008.

The sale or use of these parts or accessories does not grant the purchaser a license or other right under any Harley-Davidson patent.
