LIGHTING PANACEA TAILLIGHT SYSTEM

Note: Flashing Function Can Be Disabled Via The Control Module.</p>	 <p>Only Taillight Brightens</p>

HOW TO ORDER:

- 1 SELECT A PANACEA TAILLIGHT FOR YOUR SPECIFIC APPLICATION
- 2 SELECT PANACEA REAR TURN SIGNAL INSERTS FOR YOUR SPECIFIC APPLICATION
- 3 SELECT L.E.D. FRONT TURN SIGNAL CONVERSIONS FOR YOUR SPECIFIC APPLICATION (OPTIONAL - PG 56)

COMPLETELY PLUG-&-PLAY, THIS SYSTEM ALLOWS THE STOCK REAR INCANDESCENT LIGHTING TO BE TRANSFORMED INTO A BRILLIANT MULTI-FUNCTION L.E.D. SYSTEM.

IMPORTANT INFORMATION ABOUT PANACEA TAILLIGHTS

- 1 All wiring for trailer lights must be spliced into the wiring harness ahead of the Panacea Control Module.
- 2 If the rear of the motorcycle is equipped with any incandescent lights that were not original equipment, such lights must be spliced into the wiring harness ahead of the Panacea Control Module. Police models are often equipped with additional lights not found on their civilian counterparts. Be aware that these lights must be rewired, removed, or converted to L.E.D. prior to installing a panacea system.
- 3 The Panacea Taillight system meets FMVSS #108 when operated in "DOT mode". There is no provision in FMVSS #108 for flashing brake or amber arrows so those features are disabled when operated in "DOT mode".
- 4 Panacea Taillights can be used on '97-'01 Dynas, '96-'01 Fat Boy & FXST (except Deuce), & '99-'01 XL models, but they must be used with stock turn signals. Panacea Turn Signals are not available for these applications.

WHY USE PANACEA REAR TURN SIGNAL INSERTS?

L.E.D. Silver Bullets, stock turn signals, or other custom single filament lights can be used with the Panacea Taillight System but they will function as turn signals only. The Panacea Taillight will retain all of its functions (run, pulse brake, & amber directional arrow). To Realize the Full Benefit of Two-Color, Multi-Function Turn Signals Made Possible by the Panacea System, You Must Use Panacea Rear Turn Signal Inserts.

REAR RUN-TURN-BRAKE CONTROLLER WITH PULSE BRAKE

This module makes single filament or single circuit turn signals on the rear of the bike function as running lights, turn signals, and brake lights; not just brake/turn like our competitors! It can be used with our L.E.D. Silver Bullets, stock turn signals (red lenses sold separately) or any single filament light you may already have installed on the rear of your bike. Completely plug-&-play for most '96-newer H-D's. Compatible with '02-later H-D factory cruise control. Pulsing Brake feature can be turned on/off easily. '97-'13 Tour-Pak lighting can also be converted from stock Run-Brake to multi-function Run-Turn-Brake! One kit converts your stock taillight, turn signals and Tour-Pak lights.

5489	Run-Turn-Brake Wiring Harness for Tour-Pak Fits: '97-'13 FLHTCU/I, '10-'13 FLHTK & '08-'09 FLHTCUSE Already Equipped with a Kuryakyn Panacea Taillight System (ea) Note: Required when adding P/N 5490, Run-Turn-Brake Controller Kit with Tour-Pak Harness	\$29.99

Note: 1. These are NOT the same controllers used in Kuryakyn Panacea Systems and cannot be used in conjunction with other aftermarket or accessory modules that alter the functions of the stock taillight and turn signals. If you have already made modifications to your bike's taillight and/or turn signals, you will have to return your bike to stock form before installation. 2. Motorcycles equipped with CAN bus electrical systems never require use of a load equalizer. '97-'13 Touring, '96-'10 Softail, '97-'11 Dyna & '99-'13 Sportster equipped with factory security system and low-draw or L.E.D. turn signals also require P/N 5498.

FRONT RUN-TURN CONTROLLER

Another innovative design, this module plugs into the stock wiring harness and makes single filament custom lights function as running lights and turn signals. It works great with our Halogen Silver Bullets! One controller required per pair of lights.

TRAILER WIRING HARNESES

Safely and effectively apply the load from your trailer lighting to the battery and not to the rest of the bike's electrical system. Eliminate blown fuses caused by overloading stock lighting or accessory circuits. Our relay harness utilizes inputs from the motorcycle to direct power from the battery to the appropriate trailer lighting circuit.

- **5 Wire Plus 1:** Our kits provide standard 5 wire output (run, brake, left turn, right turn, ground) plus a bonus wire that can be connected as needed to provide fused 12v power to the trailer for compartment lights or keyless entry systems that are wired independently of the trailers essential lighting.
- **5 to 4 Wire Converter:** Plugs in and allows our Wiring & Relay Kits to power trailers requiring a 4-wire harness (run, left turn/brake, right turn/brake, ground). The bonus wire is still available to provide fused 12v power to the trailer for compartment lights or keyless entry systems that are wired independently of the trailers essential lighting. Includes 4-pin flat vehicle connector.

TTS MASTERTUNE

The most powerful tuning tool available for your motorcycles ECM, bar none! Available in two different versions, this one tool contains three powerful programs including Mastertune tuning software, Data Master data acquisition and VTune, a self-tuning software solution. Mastertune has over 20 tables and parameters to optimize your ECM including air-fuel mixture and timing. (Some early year bikes may have fewer tables). The 4-Channel Analog version offers all the same great features of the original along with four 0-8 vdc inputs for devices like EGT probes, AFR meters and such. The unit will fully integrate the 4-channel input information into DataMaster and Flight Recorder programs so it can be graphed or displayed like all other data from the ECM. Not compatible with Apple/Mac.

REFERENCE GUIDE H-D MODEL REFERENCE GUIDE

To assist in selecting the correct product for a particular application, we have assembled this reference guide. It covers nearly every model produced in the last 30 years. (Due to limited space, some omissions have been made.)

Our goal is to keep fitments as easy to understand as possible. We utilize the broadest year & model application possible & exclude specific models as needed.

For example, if a product fits all Electra Glides made for a period of time, we will say - "Fits: All '09-'13 Electra Glides". If there are any particular Electra Glide models the product won't fit, we will note the exclusion by the letter designation and/or model name - "Fits: All '09-'13 Electra Glides (except '09 FLHT Standard)".

The reference guide below lists letter designations and model names for Harley-Davidson motorcycles. It does not list the year(s) particular models were offered.
