## PANACEA TAILLIGHT SYSTEM

	PANACEA	STOCK
RUN	 <p>Taillight &amp; Turn Signals Illuminate Red</p>	 <p>Only The Taillight Is Illuminated</p>
TURN	 <p>Selected Turn Signal Flashes Amber &amp; Amber Arrow Flashes On Appropriate Side Of Taillight. Other Turn Signal Remains Illuminated Red</p>	 <p>Turn Signal Flashes Amber. Taillight Remains Illuminated</p>
BRAKE	 <p>Taillight &amp; Turn Signals Flash Red 3 Times &amp; Then Taillight &amp; Turn Signals Remain Brightly Lit Until Brake Is Released. Turn Signal &amp; Arrow Will Continue To Flash Amber During Braking Function If Turn Signal Is Activated. Note: Flashing Function Can Be Disabled Via The Control Module.</p>	 <p>Only Taillight Brightens</p>

### HOW TO ORDER:

- 1 SELECT A PANACEA TAILLIGHT FOR YOUR SPECIFIC APPLICATION
- 2 SELECT PANACEA REAR TURN SIGNAL INSERTS FOR YOUR SPECIFIC APPLICATION
- 3 SELECT L.E.D. FRONT TURN SIGNAL CONVERSIONS FOR YOUR SPECIFIC APPLICATION (OPTIONAL - PG 38)

**COMPLETELY PLUG-&-PLAY, THIS SYSTEM ALLOWS THE STOCK REAR INCANDESCENT LIGHTING TO BE TRANSFORMED INTO A BRILLIANT MULTI-FUNCTION L.E.D. SYSTEM.**

### IMPORTANT INFORMATION ABOUT PANACEA TAILLIGHTS

- 1 All wiring for trailer lights must be spliced into the wiring harness ahead of the Panacea Control Module.
- 2 If the rear of the motorcycle is equipped with any incandescent lights that were not original equipment, such lights must be spliced into the wiring harness ahead of the Panacea Control Module. Police models are often equipped with additional lights not found on their civilian counterparts. Be aware that these lights must be rewired, removed, or converted to L.E.D. prior to installing a panacea system.
- 3 The Panacea Taillight system meets FMVSS #108 when operated in "DOT mode". There is no provision in FMVSS #108 for flashing brake or amber arrows so those features are disabled when operated in "DOT mode".
- 4 Panacea Taillights can be used on '97-'01 Dynas, '96-'01 Fat Boy & FXST (except Deuce), & '99-'01 XL models, but they must be used with stock turn signals. Panacea Turn Signals are not available for these applications.

### WHY USE PANACEA REAR TURN SIGNAL INSERTS?

L.E.D. Silver Bullets, stock turn signals, or other custom single filament lights can be used with the Panacea Taillight System but they will function as turn signals only. The Panacea Taillight will retain all of its functions (run, pulse brake, & amber directional arrow). To Realize the Full Benefit of Two-Color, Multi-Function Turn Signals Made Possible by the Panacea System, You Must Use Panacea Rear Turn Signal Inserts.

### REAR RUN-TURN-BRAKE CONTROLLER WITH PULSE BRAKE

Make single filament or single circuit rear turn signals function as running lights, turn signals, and brake lights! Can be used with Kuryakyn L.E.D. Silver Bullets, stock turn signals (red lenses sold separately) or any single filament light. Completely plug-&-play for most '96-newer H-D's. Compatible with '02-later H-D factory cruise control. Pulsing Brake feature can be turned on/off easily. '97-'13 Tour-Pak lighting can also be converted from stock Run-Brake to multi-function Run-Turn-Brake! One kit converts your stock taillight, turn signals and Tour-Pak lights.

### ADJUSTABLE PASSENGER PEGS

Give your passenger multiple foot placement options, much like a highway cruise peg for riders. The Adjustable Passenger Pegs bolt onto your bike's existing rear floorboard mount, retaining all functions of the stock boards with the added benefit of new higher and farther-forward riding positions. By providing relief from the fatigue caused by the limitations of stock floorboards, the Adjustable Passenger Pegs are a must-have for two-up travelers.

## BLUEGRASS BREATHER KITS

Many Harleys puke oil out the breather and down the side of the bikes. The Bluegrass Breather can cure that. The banjo fittings and chrome tubes route the vented gasses upward so gravity can keep any expelled oil droplets in the engine. The vent line can be run up and out, or the optional catch tank is available for those who would rather vent to a closed container.

## TRAILER WIRING HARNESSES

Safely and effectively apply the load from your trailer lighting to the battery and not to the rest of the bike's electrical system. Eliminate blown fuses caused by overloading stock lighting or accessory circuits. Our relay harness utilizes inputs from the motorcycle to direct power from the battery to the appropriate trailer lighting circuit.

- 5 Wire Plus 1: Our kits provide standard 5-wire output (run, brake, left turn, right turn, ground) plus a bonus wire that can be connected as needed to provide fused 12V power to the trailer for compartment lights or keyless entry systems that are wired independently of the trailers essential lighting.
- 5 to 4 Wire Converter: Plugs in and allows our Wiring and Relay Kits to power trailers requiring a 4-wire harness (run, left turn/brake, right turn/brake, ground). The bonus wire is still available to provide fused 12V power to the trailer for compartment lights or keyless entry systems that are wired independently of the trailers essential lighting. Includes 4-pin flat vehicle connector.

# HARLEY-DAVIDSON® MODEL REFERENCE CHART

To assist in selecting the correct product for a particular application, we have assembled this reference guide. It covers nearly every model produced in the last 30 years. (Due to limited space, some omissions have been made.)

Our goal is to keep fitments as easy to understand as possible. We utilize the broadest year & model application possible & exclude specific models as needed. For example, if a product fits all Electra Glides made for a period of time, we will say - "Fits: All '09-'13 Electra Glides". If there are any particular Electra Glide models the product won't fit, we will note the exclusion by the letter designation and/or model name - "Fits: All '09-'13 Electra Glides (except '09 FLHT Standard)".

The reference guide below lists letter designations and model names for Harley-Davidson motorcycles. It does not list the year(s) particular models were offered.
