HOW TO ORDER:

- 1 SELECT A PANACEA TAILLIGHT FOR YOUR SPECIFIC APPLICATION
- 2 SELECT PANACEA REAR TURN SIGNAL INSERTS FOR YOUR SPECIFIC APPLICATION
- 3 SELECT L.E.D. FRONT TURN SIGNAL CONVERSIONS FOR YOUR SPECIFIC APPLICATION (OPTIONAL - PG 44)

COMPLETELY PLUG-&-PLAY, THIS SYSTEM ALLOWS THE STOCK REAR INCANDESCENT LIGHTING TO BE TRANSFORMED INTO A BRILLIANT MULTI-FUNCTION L.E.D. SYSTEM.

IMPORTANT INFORMATION ABOUT PANACEA TAILLIGHTS

- 1 All wiring for trailer lights must be spliced into the wiring harness ahead of the Panacea Control Module.
- 2 If the rear of the motorcycle is equipped with any incandescent lights that were not original equipment, such lights must be spliced into the wiring harness ahead of the Panacea Control Module. Police models are often equipped with additional lights not found on their civilian counterparts. Be aware that these lights must be rewired, removed, or converted to L.E.D. prior to installing a panacea system.
- 3 The Panacea Taillight system meets FMVSS #108 when operated in "DOT mode". There is no provision in FMVSS #108 for flashing brake or amber arrows so those features are disabled when operated in "DOT mode".
- 4 Panacea Taillights can be used on '97-'01 Dynas, '96-'01 Fat Boy & FXST (except Deuce), & '99-'01 XL models, but they must be used with stock turn signals. Panacea Turn Signals are not available for these applications.

WHY USE PANACEA REAR TURN SIGNAL INSERTS?

L.E.D. Silver Bullets, stock turn signals, or other custom single filament lights can be used with the Panacea Taillight System but they will function as turn signals only. The Panacea Taillight will retain all of its functions (run, pulse brake, & amber directional arrow). To Realize the Full Benefit of Two-Color, Multi-Function Turn Signals Made Possible by the Panacea System, You Must Use Panacea Rear Turn Signal Inserts.

REAR RUN-TURN-BRAKE CONTROLLER WITH PULSE BRAKE

Make single filament or single circuit rear turn signals function as running lights, turn signals, and brake lights! Can be used with Kuryakyn L.E.D. Pulsing Brake feature can be turned on/off easily. '97-'13 Tour-Pak lighting can also be converted from stock Run-Brake to multi-function Run-Turn-Brake! 1. These are NOT the same controllers used in Kuryakyn Panacea Systems and cannot be used in conjunction with other aftermarket or accessory modules that alter the functions of the stock taillight and turn signals. If modifications have been made to your taillight and/or turn signals, the bike must be returned to stock before installation. 2. Motorcycles equipped with CAN bus electrical systems don't require a load equalizer. '97-'13 Touring, '96-'10 Softail, '97-'11 Dyna & '99-'13 Sportster equipped with factory security system and low-draw or L.E.D. turn signals also require P/N 5498.

Three Positions For Ultimate Comfort!

ADJUSTABLE PASSENGER PEGS

Give your passenger multiple foot placement options, much like a highway cruise peg for riders. The Adjustable Passenger Pegs bolt onto your bike's existing rear floorboard mount, retaining all functions of the stock floorboards with the added benefit of new higher and farther-forward riding positions. By providing relief from the fatigue caused by the limitations of stock floorboards, the Adjustable Passenger Pegs are a must-have for two-up travelers.

BLUEGRASS BREATHER KITS

Many Harleys puke oil out the breather and down the side of the bikes. The Bluegrass Breather can cure that. The banjo fittings and chrome tubes route the vented gasses upward so gravity can keep any expelled oil droplets in the engine. The vent line can be run up and out, or the optional catch tank is available for those who would rather vent to a closed container.

**CRUSHER® MARKSMAN™ 4" SLIP-ONS FOR TOURING & TRIKE**

Tactfully designed with the precision of a deadeye. Visible stainless steel inserts covertly expose laser-cut Crusher emblems spanning the top perimeter of the tips. High-flow baffles with shallow-cut louvers create less turbulence inside the mufflers for improved performance throughout the RPM range. An aggressive bark at full throttle eases into a deep, low rumble at cruising speeds. Made in the U.S.A. from premium chrome-plated or high-temp black ceramic-coated steel.

- 4" Muffler diameter
- High-flow louvered baffle design with no packing to blow out over time
- Aggressive exhaust tone when accelerating, with a low, deep rumble at cruising speed
- Made in the U.S.A.

TTS MASTERTUNE

The most powerful tuning tool available for your motorcycles ECM, bar none! Available in two different versions, this one tool contains three powerful programs including Mastertune tuning software, Data Master data acquisition and VTune, a self-tuning software solution. Mastertune has over 20 tables and parameters to optimize your ECM including air-fuel mixture and timing. (Some early year bikes may have fewer tables). The 4-Channel Analog version offers all the same great features of the original along with four 0-8 vdc inputs for devices like EGT probes, AFR meters and such. The unit will fully integrate the 4-channel input information into DataMaster and Flight Recorder programs so it can be graphed or displayed like all other data from the ECM. Not compatible with Apple/Mac.
