- 2 SELECT PANACEA REAR TURN SIGNAL INSERTS FOR YOUR SPECIFIC APPLICATION
- SELECT L.E.D. FRONT TURN SIGNAL CONVERSIONS FOR YOUR SPECIFIC APPLICATION (OPTIONAL PG 42)

IMPORTANT INFORMATION ABOUT PANACEA TAILLIGHTS

- 1 All wiring for trailer lights must be spliced into the wiring harness ahead of the Panacea Control Module.
- 2 If the rear of the motorcycle is equipped with any incandescent lights that were not original equipment, such lights must be spliced into the wiring harness ahead of the Panacea Control Module. Police models are often equipped with additional lights not found on their civilian counterparts. Be aware that these lights must be rewired, removed, or converted to L.E.D. prior to installing a panacea system.
- 3 The Panacea Taillight system meets FMVSS #108 when operated in "DOT mode". There is no provision in FMVSS #108 for flashing brake or amber arrows so those features are disabled when operated in "DOT mode".
- 4 Panacea Taillights can be used on '97-'01 Dynas, '96-'01 Fat Boy & FXST (except Deuce), & '99-'01 XL models, but they must be used with stock turn signals. Panacea Turn Signals are not available for these applications.

WHY USE PANACEA REAR TURN SIGNAL INSERTS?

L.E.D. Silver Bullets, stock turn signals, or other custom single filament lights can be used with the Panacea Taillight System but they will function as turn signals only. The Panacea Taillight will retain all of its functions (run, pulse brake, & amber directional arrow). To Realize the Full Benefit of Two-Color, Multi-Function Turn Signals Made Possible by the Panacea System, You Must Use Panacea Rear Turn Signal Inserts.

ALARM COMPATIBLE LOAD EQUALIZER

When either a Panacea System or a Run-Turn-Brake Controller is installed on a late-model H-D equipped with a factory security system (TSSM) and L.E.D. or low-draw turn signals, the security remains fully functional. TOUR-TECH™ CRUISE MOUNTS

The entire assembly can be moved up or down on the engine guard. Short Arm Mounts place the peg 4" back from the bar for taller riders, while the Long Arms are 6" back for shorter riders. The arm and footpeg may be further adjusted along a vertical or horizontal arc. A unique clevis permits angle adjustment of the footpeg. The heavy-duty Quick Clamp and sturdy offset arm ensures that the footpegs will clear fairing lowers and will stay where you put them. Recommended for any model using 1-1/4" engine guards.

BLUEGRASS BREATHER KITS

Many Harleys puke oil out the breather and down the side of the bikes. The Bluegrass Breather can cure that. The banjo fittings and chrome tubes route the vented gasses upward so gravity can keep any expelled oil droplets in the engine. The vent line can be run up and out, or the optional catch tank is available for those who would rather vent to a closed container.

REFERENCE HARLEY-DAVIDSON® BIKE MODEL

To help select the correct product for a particular application, we've assembled this reference guide. It covers nearly every model produced in the last 30 years. (Due to limited space, some omissions have been made.) The reference guide below lists letter designations and model names for Harley-Davidson motorcycles. It does not list the year(s) particular models were offered.

For example, if a product fits all Electra Glides made for a period of time, you'll see: "Fits: All '09-'13 Electra Glides." For Electra Glide models the product won't fit, we will note the exclusion by the letter designation and/or model name: "Fits: All '09-'13 Electra Glides (except '09 FLHT Standard)."
