

SPORTSTER® MODELS

2013 HARLEY-DAVIDSON® PARTS CATALOG

GENERAL INFORMATION

THIS IS NOT AN ASSEMBLY MANUAL AND SHOULD NOT BE USED AS SUCH

About This Manual

This Parts Catalog has been prepared to make it easier for you to order parts for your 2013 motorcycles. You will also find a complete Hardware Listing at the back of the book for your convenience. The numbers shown in the illustrations correspond to the numbers in the "INDEX NO." column in the parts lists. Consult the illustrations when ordering parts to make sure you receive all the required parts. Take note that the number in parenthesis following the part description is the quantity of that part needed for complete assembly; if there is no number in parenthesis, only one is used. Prices of parts in this catalog are published separately.

The following instructions should be followed carefully when ordering parts:

- The "MODEL(S)" column in the parts lists may include one or more two-character (three-character for FLT and Softail) codes that correspond to the V.I.N. model designations and engine type. The models and their respective two-character (three-character for FLT and Softail) codes are listed at the bottom of each right-hand page for your reference. If a part fits all models, "ALL" will be in the corresponding "MODEL(S)" column.
- Be sure to specify the correct part number for each item. The part numbers appear under the "PART NO." column in the parts lists.
- Orders may be placed via your computer for all parts. Review your system documentation for details on placing orders electronically. All non-warranty replacement crankcase orders require return of the complete left crankcase half with V.I.N.. All non-warranty replacement frame orders require return of the steering neck with V.I.N.. Non-compliance will result in a fine. See non-warranty frame and crankcase policy or contact Dealer Services for details.
- The sale or use of these parts or accessories does not grant the purchaser a license or other right under any Harley-Davidson patent.
- For all 2008 and later painted parts refer to the Service Section of h-dnet.com which features a listing of painted part numbers, except CVO (Custom Vehicle Operations) models which are located in their own respective catalogs.
- All parts that were added for the new model year will have a vertical bar located on the parts list page to the left of the index number. This can be used to quickly identify any new parts that are unique to a specific model, and help distinguish new and previous model year parts. In the back of the book you will find a New Parts List. This list will serve as a summary of new parts.
- Parts marked **"RESTRICTED SALE PART"** are limited edition items and can only be ordered as direct replacements.
- Orientation Symbols:
Orientation symbols will be used when the illustration is not in the standard "Right-Front" orientation. The symbol will be a motorcycle with an arrow in the front indicating the direction of view. The symbol will be located at the bottom left or right hand side of the illustration page.

To the best knowledge of Harley-Davidson Motor Company, the material contained herein is accurate as of the date this publication was approved for printing. Harley-Davidson Motor Company reserves the right to change specifications, equipment, or designs at any time without notice and without incurring obligation.

Vehicle Identification Number (V.I.N.)

See Figure 1. A unique 17-digit serial, or V.I.N., is assigned to each motorcycle. For a description of each item in the V.I.N., refer to Table 1.

For all models except VRSC the full 17-digit serial, or V.I.N., is stamped on the right side of the frame backbone at the rear of the steering head. The V.I.N. is also printed on a label on the right front down tube. An abbreviated V.I.N. is stamped on the left side crankcase between the front and rear cylinders.

For VRSC models only the full 17-digit serial, or V.I.N., is stamped on the right side of the steering head. The V.I.N. is also printed on a label on the left frame tube above the front engine cylinder. An abbreviated V.I.N. is stamped on the left side crankcase below the rear cylinder head.

Always give the full 17-digit V.I.N. when ordering parts or making any inquiry about your motorcycle.

Index 5

Is only sold as part of XL883L fuel tank assemblies.

Index 6

Is only sold as part of XL1200N fuel tank assemblies.

Index 7

Is only sold as part of XL883N fuel tank assemblies.

Index 8

Is only sold as part of XR1200X fuel tank assemblies.

Index 9

Is only sold as part of XL1200X fuel tank assemblies.

Index 10

Is only sold as part of XL1200CP fuel tank assemblies.

Index 11

Is only sold as part of XL1200CP fuel tank assemblies.

Index 12

Is only sold as part of XL1200CA & XL1200CP fuel tank assemblies.

Index 13

Is only sold as part of XL1200V fuel tank assemblies.

⚠ WARNING Battery Removal Sparks can cause battery explosion. Death or serious injury could occur. To avoid sparks: • Disconnect negative battery cable first. • Keep cable away from all metal parts. • Do not allow red-marked positive battery cables to touch metal motorcycle parts with negative cable connected. • If vehicle is equipped with optional security alarm, verify that no is present and turn ignition key to IGNITION before removing main fuse or disconnecting battery. 1. Unscrew nut and remove negative battery cable from cranking stud (see Figure 1). Keep end of negative battery cable away from all metal parts. 2. Unscrew bolt and remove red-marked positive battery cable from battery positive (+) terminal. 3. Unscrew bolt and remove battery hold-down strap. 4. Slide battery out until the battery negative (-) terminal is accessible. Disconnect the negative cable at the battery (-) terminal. Leave the cable on the vehicle.	⚠ WARNING Battery Installation Sparks can cause battery explosion. Death or serious injury could occur. To avoid sparks: • Connect red-marked positive battery cables first. Do not allow red-marked positive battery cables to touch metal motorcycle parts with negative cable connected. • While connect the red-marked positive battery cables, keep negative cable away from metal parts.  FIGURE 1	CAUTION Failure to connect cables to the correct battery terminals could cause damage to the motorcycle electrical system. Over-tightening battery terminal bolts could cause damage to battery terminals. Use recommended torque values. 1. Place the fully charged battery into the battery tray. 2. Insert bolt through negative battery cable and into threaded hole of battery negative (-) terminal. Tighten bolt to 60-70 in-lbs (8.3-9.8 Nm). Keep negative cable away from metal parts and the ground stud until the red-marked positive cables are attached. 3. Insert bolt through red-marked positive battery cables and into threaded hole of battery positive (+) terminal. Tighten bolt to 60-70 in-lbs (8.3-9.8 Nm). 4. Place the negative battery cable onto ground stud. Press cable connector against cable stop on crankcase. Tighten nut to 55-75 in-lbs (8.3-10.5 Nm).

2

⚠ WARNING

A connected battery can cause a spark or motorcycle startup while servicing. Death or serious injury could occur.

- Disconnect negative cable before servicing.
- Keep cable away from terminal while servicing.

3

⚠ WARNING

Motorcycles are different from other vehicles. They operate, steer, handle and brake differently. Unskilled or improper use could result in loss of control, death or serious injury.

- Take a rider training course.
- Read Owner's Manual before riding, adding accessories or servicing.
- Wear a helmet, eye protection and protective clothing.
- Never tow a trailer.

To be removed by customer only.
